

# Using the Climate Vulnerability Index (CVI) Dashboard for grant funding opportunities and community advocacy

Prepared by:

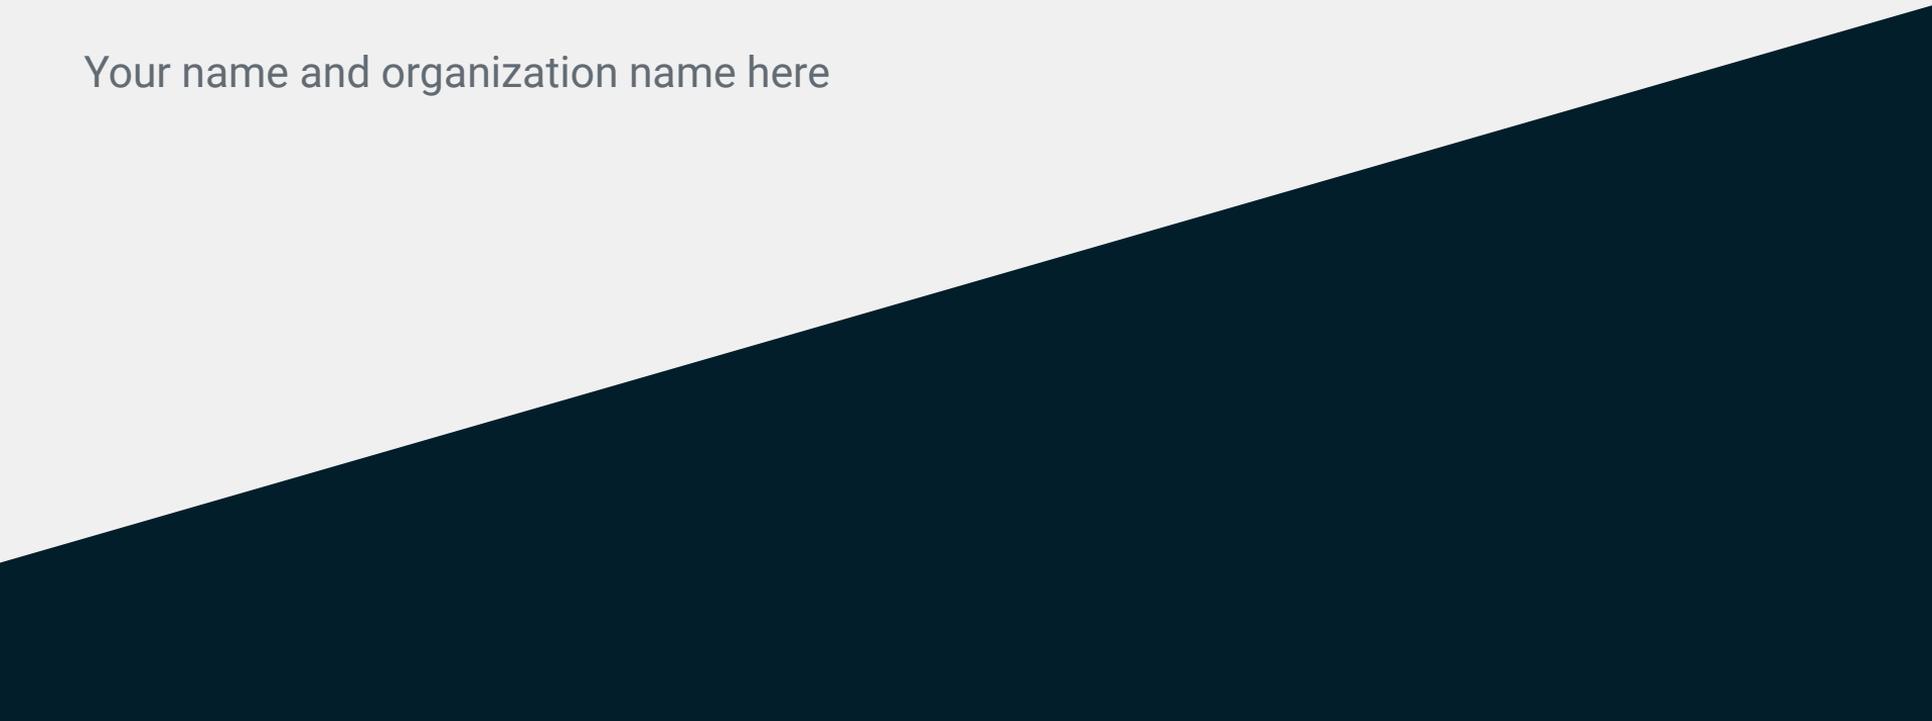

*Nina Lutz, Lauren Johnson on behalf of Environmental Defense Fund (EDF)*

**This template will show you how to use the CVI to help enact the change you want to see in your community and more.**

**Please feel free to use any of these slides for your next grant application or other advocacy needs!**

# Your advocacy/grant title here

Your name and organization name here

A dark blue diagonal graphic that starts from the bottom left corner and extends towards the top right corner, covering the lower half of the page.

# Name of your advocacy or grant application

Details about your grant application or advocacy efforts.

Hint: Consider things like...

- What grant are you applying for?
- When is the deadline?
- What is the topic area?
- Who is the sponsor?

More details here

Hint: Consider things like...

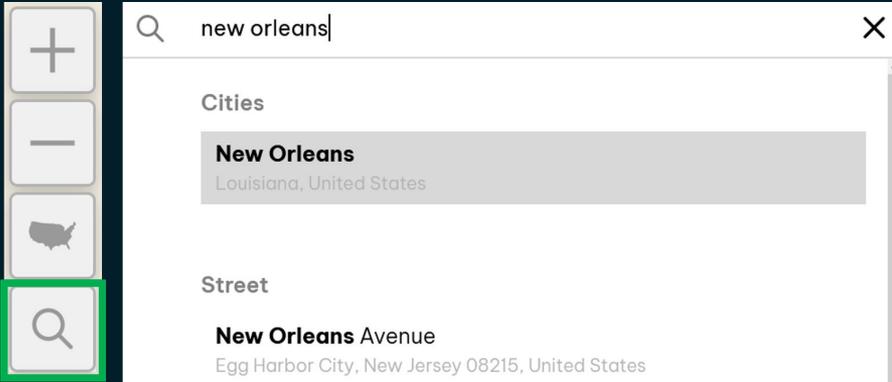

- What are key things about your community or case study you want to advocate for?
- What lived experiences and harms are people experiencing that are related to climate change?

*We will cover applying for Justice40, IRA, and IIJA grants later!*

I am an instruction slide – you can delete me when you finish!

## Step 1:

Go to the [CVI](#) and enter your location in the search bar

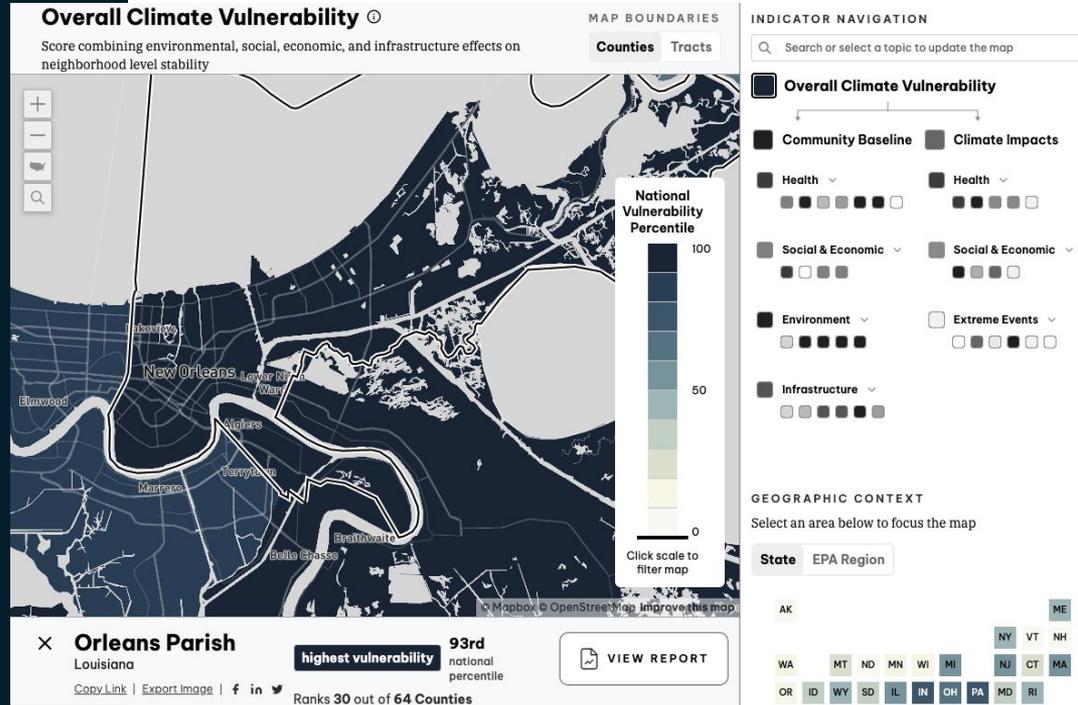

You can search for lots of places, like...

- Address
- Street
- Neighborhood
- Zip Code
- City
- State

I am an instruction slide – you can delete me when you finish!

**Step 2:**  
Click on the map to see a summary of vulnerabilities.

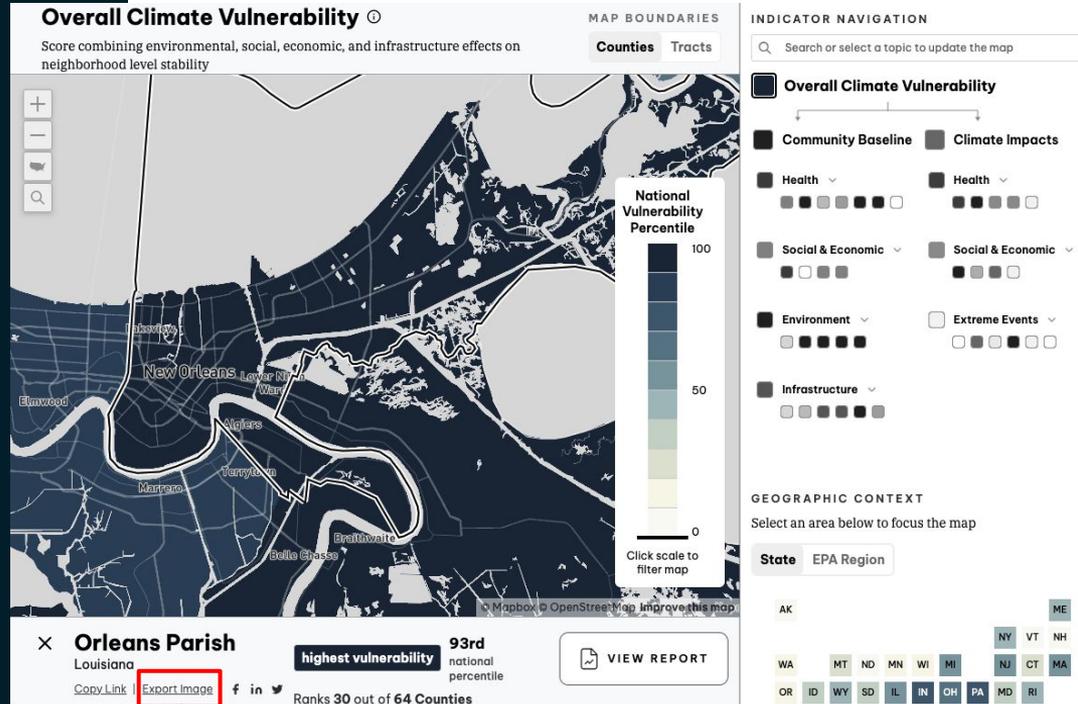

Use the right side to explore more metrics, like “Community Baseline” or “Health” or “Infrastructure”

I am an instruction slide – you can delete me when you finish!

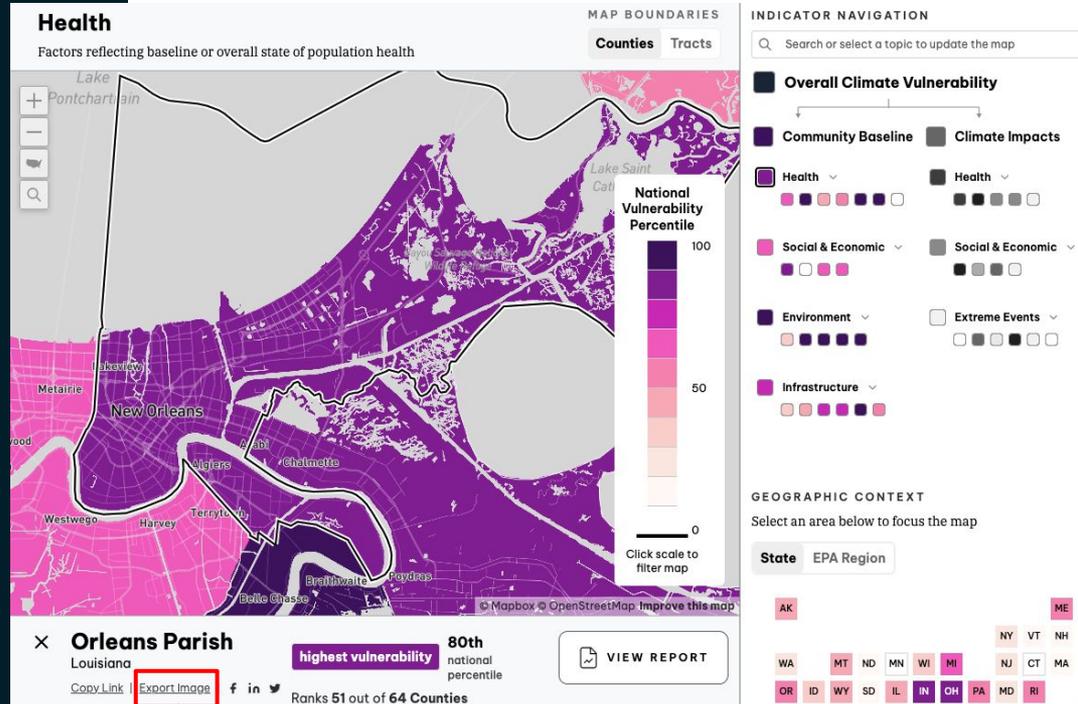

## Step 3: Export Images

Hit “Export Image”  
to view and use  
images of each  
metric saved to  
your computer.

I am an instruction slide – you can delete me when you finish!

Click on any of the squares to view different indicators like “Health” or “Environment” and keep exporting images.

Export Image

**Drop an exported image of  
your “Overall Climate  
Vulnerability” here!**

Add a note about this place here. Where is it? What happens here?

Drop an exported image of your  
“Community Baseline” vulnerability  
here!

**Hint:** you can get this screenshot by  
clicking “Community Baseline,” then  
“Export Image.”

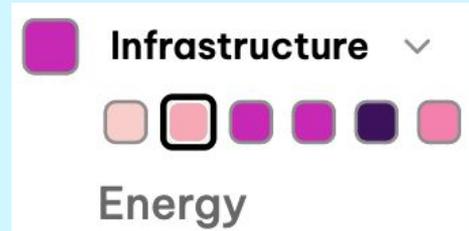

Add a note about this place here. Where is it? What happens here?

Info about this  
place here

More info can go here

Drop an exported image  
of another metric here!

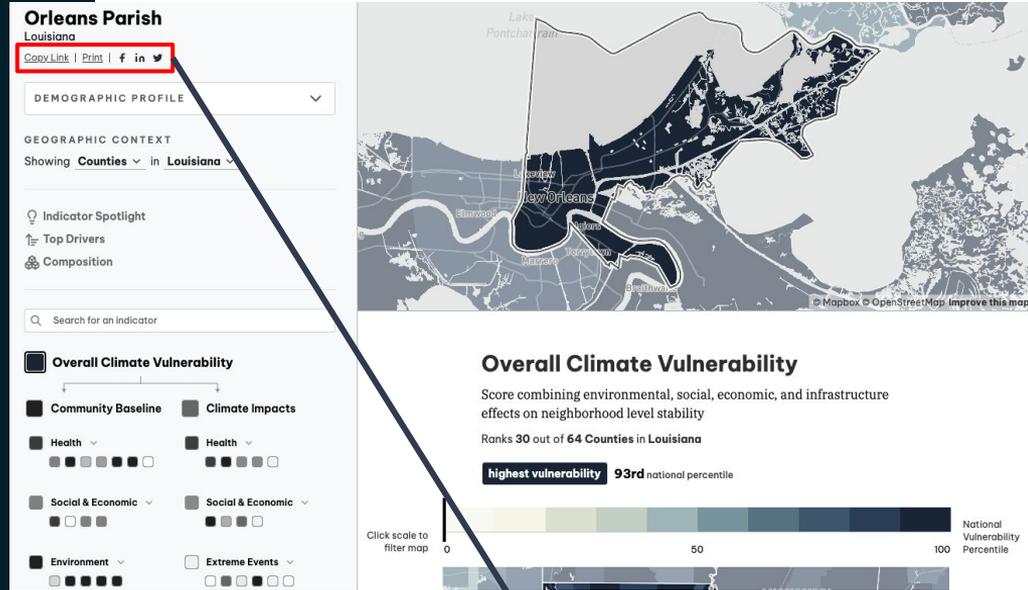

**Hint:** try pressing  
“Infrastructure,” then  
perhaps a square under it like  
“Energy.”

I am an instruction slide – you can delete me when you finish!

**Step 5:**  
Download a PDF of your report for future reference by hitting “Print” in the upper left.

You can also share a link to this report with the “Copy Link” button or promoting it via social media.

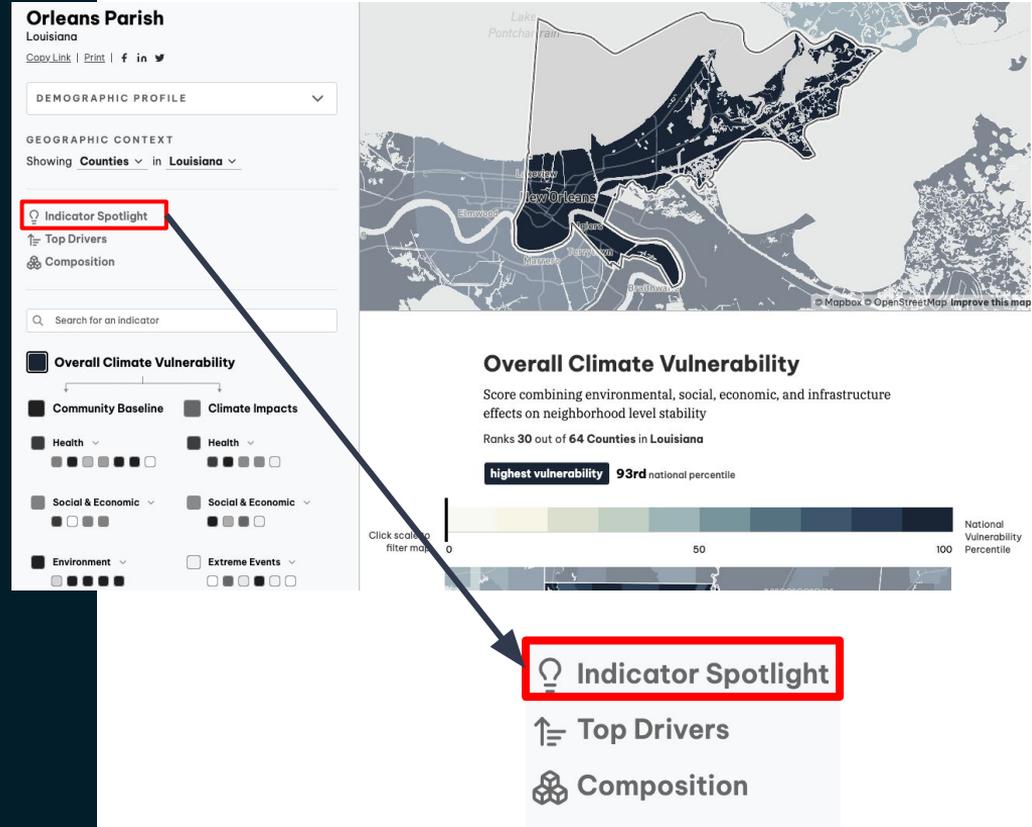

[Copy Link](#) | [Print](#) | [Overlay Data](#) | f in

I am an instruction slide – you can delete me when you finish!

## Step 6: Explore the report data starting with Indicator Spotlight.

You can view data for  
different indicators by  
clicking on the squares  
under “Overall Climate  
Vulnerability”

# Your area report info

**Consider filling out some of these statistics from your report on this slide.**

National Percentile of Overall Climate Vulnerability: *Your statistic here*

Ranking of vulnerability out of the state: *Your statistic here*

*Optional:* Consider dropping a screenshot of your report here.

**Hint:** you can use any indicators you like for these screenshots. Copy or save an image by right clicking on it.

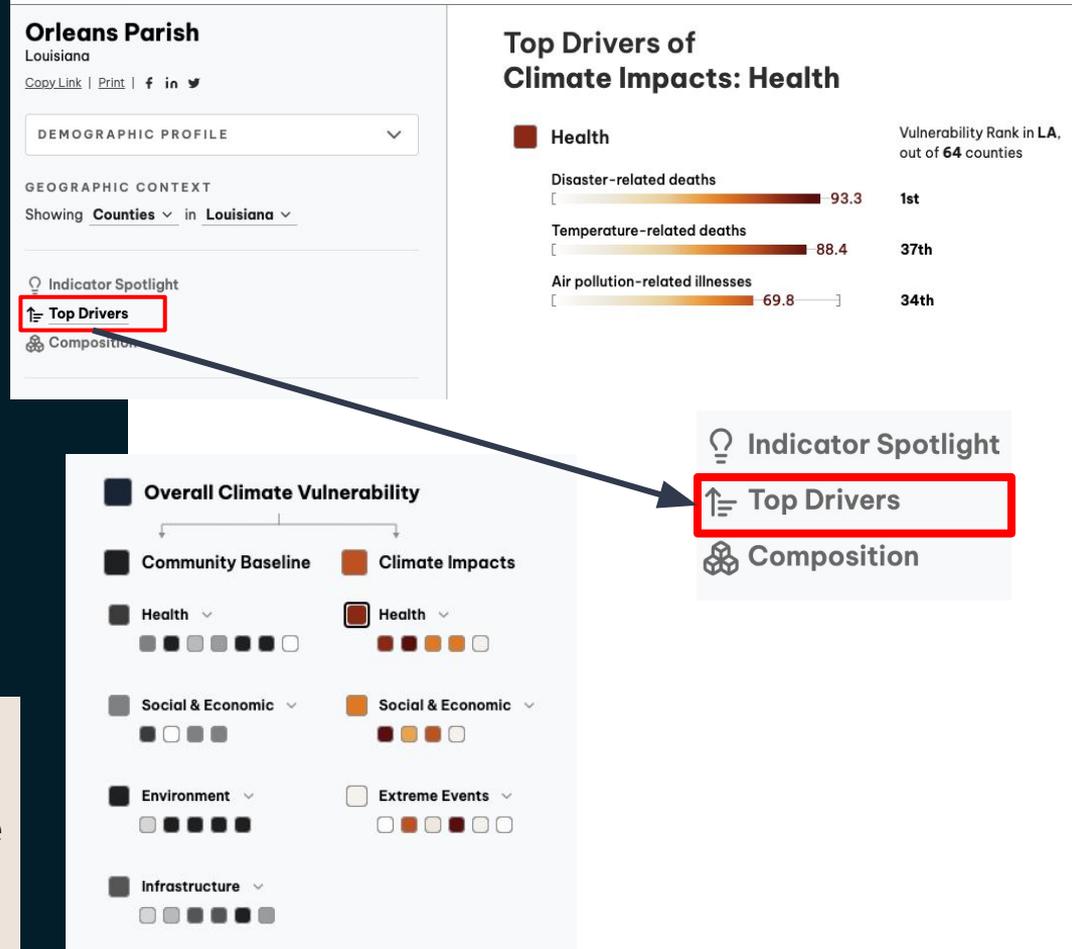

Add a note about this place here. Where is it? What happens here?

I am an instruction slide – you can delete me when you finish!

## Step 7: Explore the report data with Top Drivers by clicking “Top Drivers.”

This data tells you what is driving this ranking of your indicator.

**Note:** Not all squares have “Composition” and “Top Drivers” in their reports. If your metric doesn’t, that’s ok! Consider adding the metric of the category of your data (i.e. “Health”, “Infrastructure”, etc).

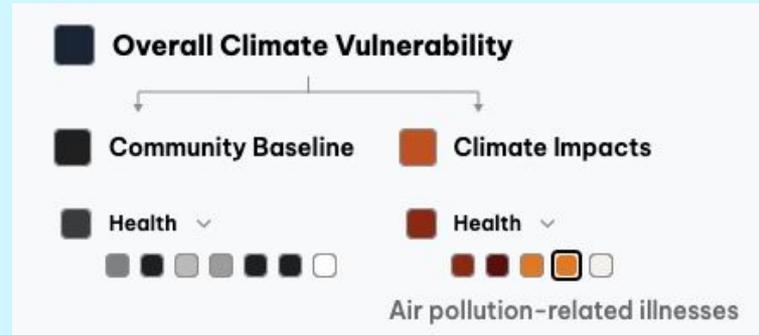

Info about this  
metric and  
place here

More info can go here

*Optional:* Considering adding a screenshot of your “Top Drivers” here.

**Hint:** you can use any indicators you like! For example, try “Air pollution-related illnesses” under the right “Health” square.

I am an instruction slide – you can delete me when you finish!

## Step 8: Explore the report data with Composition.

This will give you a  
summary of the data and  
the factors that go into it.

**Note:** Not all squares have “Composition” and “Top Drivers” in their reports. If your metric doesn’t, that’s ok! Consider adding the metric of the category of your data (i.e. “Health” or “Infrastructure”).

# Your Area Report Info

**Consider listing out the “Top Drivers” and “Composition” information from your report to present in this deck.**

*Optional:* Drop a screenshot of your “Composition” summary here.

**Hint:** you can use any indicators you like for these screenshots. Try “Health” for your geography.

Add a note about this place here. Where is it? What happens here?

You can use the CVI for Justice40 grants as well.

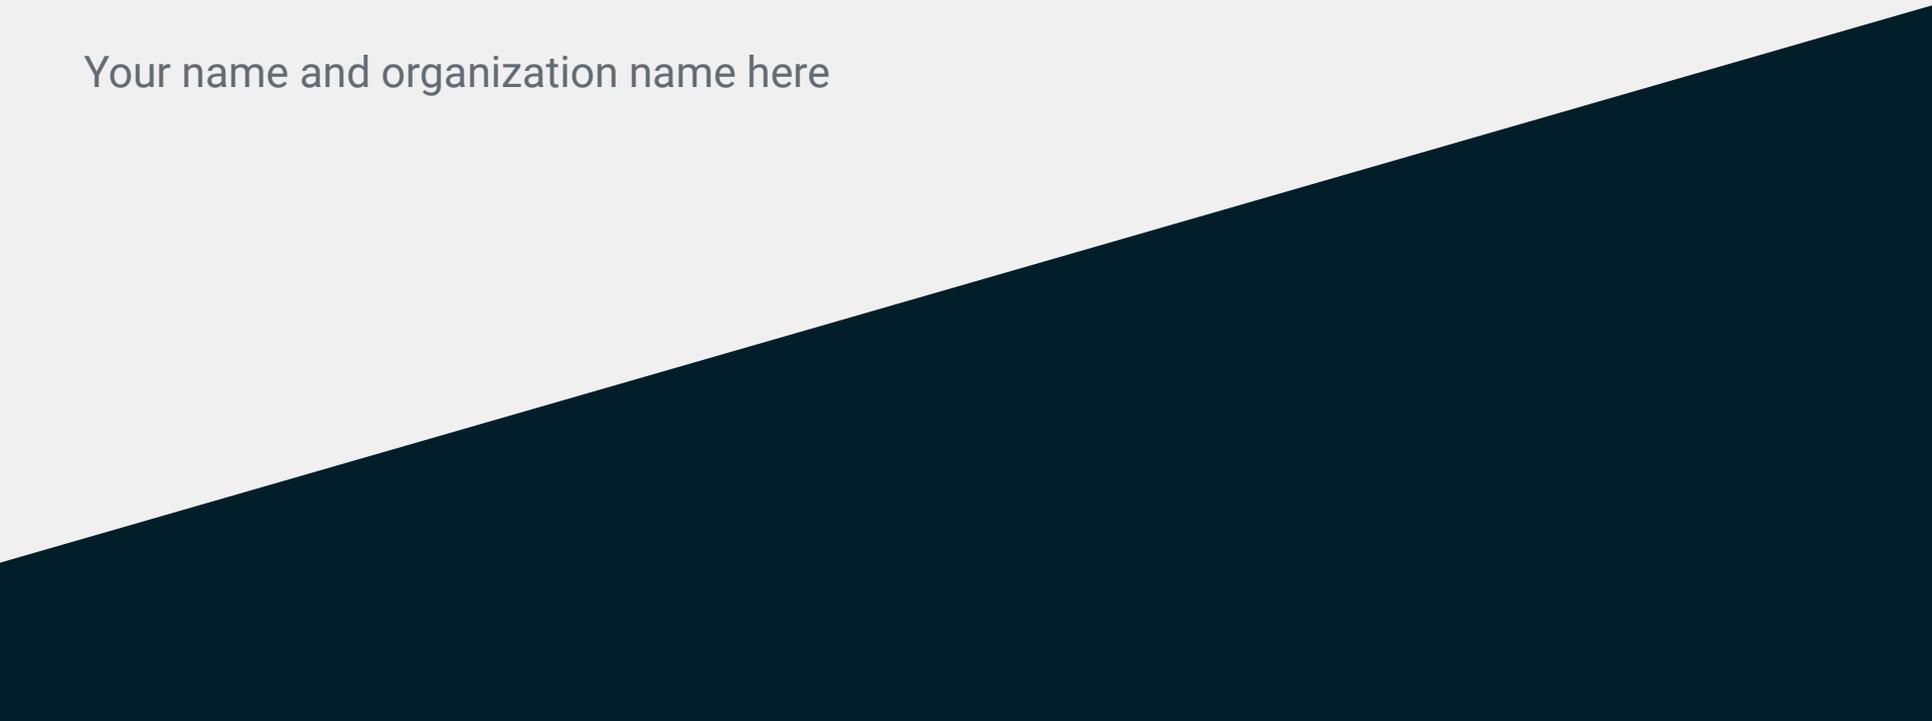

Go [here](#) for more information about Justice40.

# Identify a IRA, IIJA, and Justice40 grant using the CVI Resources Page

Grants on the Resources page  
are organized according to CVI  
data categories

# Your Justice40-related grant title here

Your name and organization name here

A dark blue diagonal graphic that starts from the bottom left corner and extends towards the top right corner, covering the bottom half of the page.

# Name of your Justice40-related grant application

Details about your grant application or advocacy efforts.

Hint: Consider things like...

- What grant are you applying for?
- When is the deadline?
- What is the topic area?
- Who is the sponsor?

More details here

Hint: Consider things like...

- What are key things about your community or case study you want to advocate for?
- What lived experiences and harms are people experiencing that are related to climate change?

These 7 Justice40 categories map to CVI indicators. You can download a table of them here.

Climate change

Clean Energy &  
Energy Efficiency

Clean Transit

Affordable &  
Sustainable Housing

Training & Workforce  
Development

Remediation & Reduction  
of Pollution

Development of Critical Clean Water  
& Wastewater Infrastructure

# Climate Change

## **Public Health Impacts**

---

Temperature-related mortality  
Deaths from climate disasters  
Increased PM<sub>2.5</sub> mortality - CVD (ages 65+)  
Increased Ozone mortality (all ages)  
Increase in childhood asthma incidence  
*Aedes albopictus* dengue transmission increase  
*Aedes aegypti* zika transmission increase  
*Aedes aegypti* dengue transmission increase  
Surface PM<sub>2.5</sub>

## **Property**

---

Flooding risk to properties  
Wildfire risk to properties  
Property taxes expected to be lost by 2045 due to chronic inundation

## **Emissions**

---

State energy-related carbon dioxide emissions by year  
Methane Emissions

## **Weather Events**

---

Hurricane - Annualized Frequency  
Tornado - Annualized Frequency  
Wildfire - Annualized Frequency  
Drought - Annualized Frequency

## **Crime**

---

Property Crimes (% change)  
Violent Crimes (% change)

## **Weather Trends**

---

Cold Wave - Annualized Frequency  
Days with maximum temperature above 35°C  
Days with maximum temperature above 40°C  
Maximum of maximum temperatures  
Mean temperature  
Urban Heat Island Extreme Heat Days  
Winter Weather - Annualized Frequency  
Snowfall  
Frost Days  
Consecutive Dry Days  
Standardized Precip Index  
Total Precipitation

## **Flooding and Sea Level**

---

Coastal Flooding - Annualized Frequency  
Riverine Flooding - Annualized Frequency  
Sea Level Rise

## **Economics**

---

FEMA Hazard Mitigation Grants  
Cost of climate disasters  
High-Risk Jobs Productivity (% change)  
Yields (% change)  
Expected Annual Loss - Agriculture Value  
Expected Annual Loss - Building Value  
Expected Annual Loss - Population Equivalence  
Residential Energy Expenditures (% change)  
Share of Jobs in Agriculture

**Affordable & Sustainable Housing**

**Housing types**

Multi-Unit Structures  
Group Quarters  
Mobile Homes

**Housing risks**

Housing Foreclosure Risk  
Percent of Housing Units Built Between 1940-1969 as of 2015-2019  
Crowding

**Clean Energy & Efficiency**

**Residential Energy**

Residential Energy Cost Burden  
Residential Energy Expenditures (%change)

**Energy Emissions**

State Energy-related Carbon Dioxide Emissions by Year  
Share of Energy from Fossil Fuels

**Training & Workforce Development**

**Risks to Workers**

Outdoor Workers - Work Days at Risk per Year

**Development of Clean Water & Wastewater Infrastructure**

**Clean Water and Wastewater**

Indoor Plumbing  
Lead in Drinking Water Violations

**Flooding and Sea Level**

Coastal Flooding - Annualized Frequency  
Riverine Flooding - Annualized Frequency  
Flooding Risk to Roads  
Flooding Risk to Properties  
Sea Level Rise

## Remediation & Reduction of Legacy Pollution

### Harmful Exposures

Agricultural Pesticides  
Stream Toxicity Risk- Screening Environmental Indicators (RSEI)  
Black Carbon  
Pollution Sources  
Lead Paint: % Housing Units Built Before 1960 per Census Tract  
Lead in Drinking Water Violations

### Waste Sites

Metal Recyclers  
Hazardous Waste Management Facilities (TSDFs)  
Hazardous Waste Generators/Incinerators  
Landfills

### Dangerous Sites

Superfund Sites  
Brownfields  
Proximity to Facilities Participating in Air Markets  
National Priorities List (NPL) sites  
Facilities with Enforcement or Violation  
Toxic Substances Control Act (TSCA) Facilities  
Risk Management Plan Facilities  
Chemical Manufacturers  
Active Oil and Gas Wells

## Clean Transit

### Transportation Access

Housing Type & Transportation  
Transportation Sources  
National Transportation Noise Map  
Transportation  
No Vehicle  
Walkability  
Bikability

### Transit Infrastructure

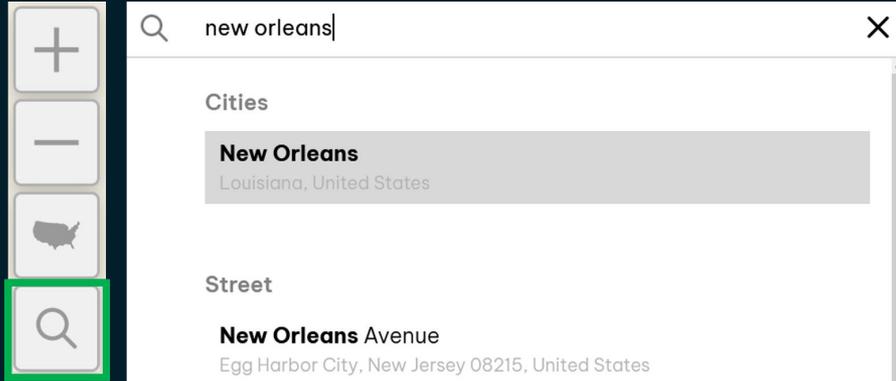

Delay (congestion) per capita/census tract  
Flooding risk to roads  
Lane miles per capita  
Road Quality and Maintenance  
Bridge Quality and Maintenance  
Public Transit Performance

You can use any of these indicators to get relevant CVI maps and reports for Justice40-related grant funding applications.

**Hint:** List some relevant indicators here for easy reference!

I am an instruction slide – you can delete me when you finish!

# Step 1: Go to the [CVI](#) and enter your location in the search bar

You can search for lots of places,  
like...

- Cities
- An address
- A county
- A census tract
- A street
- An area or neighborhood
- A zip code

I am an instruction slide – you can delete me when you finish!

## Step 2: Pick an indicator, like “Temperature Related Deaths”

You can search for lots of indicators like...

- Childhood asthma
- Pollution
- Increased ozone mortality
- Flooding risk to properties
- Lead paint in housing

...and more

I am an instruction slide – you can delete me when you finish!

# Step 4: Explore CVI data, export images, and consider printing the report for the Justice40 grant application.
