Matching Vulnerabilities and Impacts to Resources

The passage of the **Inflation Reduction Act** (IRA) in 2022 and the **Infrastructure Investment and Jobs Act** (IIJA) in 2021 marks a historic level of federal investment in measures to help the United States meet its goal of reducing U.S. greenhouse gas emissions by 50% or more by 2030 (compared to 2005) levels and improve the infrastructure, health, equity, and resilience of American communities. In addition, the **Justice 40 Initiative** is a whole-of-government initiative to ensure that 40% of the overall benefits of certain federal investments flow to disadvantaged communities that are marginalized, underserved, and overburdened by pollution.

Below you will find a comprehensive list of current and forthcoming IRA, IIJA, and Justice 40-related resources that can help communities plan, prepare, and adapt to climate change.

---

**Contents**

**Baseline Vulnerability – Health**

1. Brownfield Grant Funding
2. Brownfield Job Training Grants
3. Clean Ports Program
4. Clean School Bus Program
5. Clean Water State Revolving Fund
6. Diesel Emissions Reduction Act Program
7. Distance Learning and Telemedicine Grants
8. Drinking Water State Revolving Fund
9. Environmental and Climate Justice Grants
   a. Environmental and Climate Justice (ECJ) Grant Program
   b. Environmental Justice Thriving Communities Grantmaking (EJ TCGM) Program
   c. Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program
   d. Environmental Justice Government-to-Government (EJG2G) Program
10. Home Energy Rebate Programs
11. Orphan Well Site Plugging, Remediation, and Restoration Programs
   a. Orphaned Well Site Plugging, Remediation, And Restoration Program
   b. Federal Orphaned Well Program
   c. Orphaned Wells on Tribal Lands
12. Reduction of Truck Emissions at Port Facilities Program
13. Renew America’s Schools
14. Renew America’s Nonprofits Program
15. Sanitation Facilities Construction Program
16. Superfund Hazardous Substance Research and Training Program
17. Underground Injection Control Grants

**Baseline Vulnerability – Social & Economic**

1. Affordable Connectivity Program
2. Building Codes Implementation for Efficiency and Resilience Program
3. Building Resilient Infrastructure and Communities
4. Building, Training, and Assessment Centers
5. Career Skills Training
6. Clean Energy Production Tax Credit and Clean Electricity Investment Credit
7. Clean Vehicle Credit
8. Competitive Grants for Non-Federal Forest Landowners
10. Energy Efficiency and Conservation Block Grant Program
11. Energy Infrastructure Reinvestment Program
12. Emergency Food and Shelter Program
13. Empowering Rural America New ERA Program
14. Federal Income Tax Credits and Incentives for Energy Efficiency
15. Federal Emergency Management Agency Public Assistance Program
16. Flood Mitigation Assistance Grant Program
17. Green and Resilient Retrofit Program
18. Hazard Mitigation Assistance Grants
19. Home Efficiency Rebates
20. Home Electrification and Appliance Rebates
21. Home Energy Rebate Programs
22. Low Income Home Energy Assistance
23. National Flood Insurance Program
24. Orphan Well Site Plugging, Remediation, and Restoration Programs
   a. Orphaned Well Site Plugging, Remediation, And Restoration Program
   b. Federal Orphaned Well Program
   c. Orphaned Wells on Tribal Lands
25. Reconnecting Communities and Neighborhoods Program
   a. Neighborhood Access and Equity Grant Program
   b. Reconnecting Communities Pilot Program
26. Residential Clean Energy Credit
27. Safeguarding Tomorrow Revolving Loan Fund Program
28. USDA Funds for Financially Distressed Borrowers
29. Weatherization Assistance Program

Baseline Vulnerability – Infrastructure
1. Active Transportation Infrastructure Investment Program
2. Advanced Battery R&D Consortium
3. Advanced Energy Manufacturing and Recycling Grant Program
4. Affordable Connectivity Program
5. Airport Terminal Program
6. All Stations Accessibility Program
7. Battery Manufacturing and Recycling Grants
8. Battery Material Processing Grants
9. Bioproduct Pilot Program
10. Bridge Investment Program
11. Broadband Equity, Access, and Deployment Program
12. Building Codes Implementation for Efficiency and Resilience Program
13. Building, Training, and Assessment Centers
14. Capital Investment Grants Program
15. Carbon Capture Demonstration Program
16. Carbon Dioxide Transportation Infrastructure Finance and Innovation Program
17. Carbon Reduction Program
18. Carbon Storage Validation and Testing Program
19. Carbon Utilization Program
20. Civil Nuclear Energy Program
21. Charging and Fueling Infrastructure Grant Program
22. Clean Energy Demonstration Program on Current and Former Mine Land
23. Clean Heavy-Duty Vehicle Program
24. Clean Hydrogen Electrolysis
25. Clean Hydrogen Manufacturing Recycling Program
26. Clean Ports Program
27. Clean School Bus Program
28. Clean Vehicle Credit
29. Clean Water State Revolving Fund
30. Climate Change Technical Assistance Program
31. Commercial Direct Air Capture Technology Prize Competition
32. Consolidated Rail Infrastructure and Safety Improvements Program
33. Cybersecurity For the Energy Sector Research, Development, And Demonstration Program
34. Diesel Emissions Reduction Act Program
35. Discrimination Financial Assistance Program for Farmers, Ranchers, and Forest Landowners
36. Distance Learning and Telemedicine Grants
37. Drinking Water State Revolving Fund
38. Drinking Water System Infrastructure Resilience and Sustainability Program
39. Electric or Low-Emitting Ferry Pilot Program
40. Empowering Rural America New ERA Program
41. Energy Auditor Training Grant Program
42. Energy Efficiency and Conservation Block Grant Program
43. Energy Efficiency Revolving Loan Fund Capitalization Grant Program
44. Energy Infrastructure Reinvestment Program
45. Energy Sector Operational Support for Cyber Resilience Program
46. Energy Storage Demonstration and Pilot Grant Program
47. Enhanced Mobility of Seniors & Individuals with Disabilities
48. Environmental and Climate Justice Grants
   a. Environmental and Climate Justice (ECJ) Grant Program
   b. Environmental Justice Thriving Communities Grantmaking (EJ TCGM) Program
   c. Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program
   d. Environmental Justice Government-to-Government (EJG2G) Program
49. Federal-State Partnership for Intercity Passenger Rail Grant Program
50. Ferry Boat Program
51. Ferry Service for Rural Communities
52. Funding to address air pollution at schools
53. Green and Resilient Retrofit Program
54. Grid Innovation Program
55. Home Efficiency Rebates
56. Home Electrification and Appliance Rebates
57. Highway Safety Grants Program
58. Highway Safety Improvement Program
59. Long-Duration Energy Storage Demonstrations
60. Low-Income Communities Bonus Credit Program
61. Low or No Emission Vehicle Program
62. Low Emissions Electricity Program
63. Maintaining and Enhancing Hydroelectricity Incentives
64. Middle Mile Grant Deployment
65. National Dam Safety Program State Assistance Grant Program
66. National Earthquake Hazards Reduction Program’s State Assistance Program
67. National Electric Vehicle Infrastructure Formula Program
68. National Flood Insurance Program
69. National Priority Safety Program
70. Nationally Significant Multimodal Freight and Highway Projects
71. Native Hawaiian Climate Resilience Program
72. Natural Gas Distribution Infrastructure Safety and Modernization Grant Program
73. Next Generation Warning System Grant Program
74. Port Infrastructure Development Program
75. Pre-Commercial Direct Air Capture Prize Competitions Program
76. Preventing Outages and Enhancing the Resilience of the Electric Grid Grants Program
77. Promoting Resilient Operations for Transformative, Efficient, and Cost-saving Transportation Program (PROTECT) Program
78. Pumped Storage Hydropower Wind and Solar Integration and System Reliability Initiative
79. Railroad Crossing Elimination Program
80. Rebuilding American Infrastructure with Sustainability and Equity Program
81. Reconnecting Communities and Neighborhoods Program
   a. Neighborhood Access and Equity (NAE) Grant Program
   b. Reconnecting Communities Pilot (RCP) Program
82. Reduction of Truck Emissions at Port Facilities Program
83. Rehabilitation of High Hazard Potential Dams Grant Program
84. Renew America’s Schools
85. Renew America’s Nonprofits Program
86. Residential Clean Energy Credit
87. Rural and Municipal Utility Advances Cybersecurity Grant and Technical Assistance Program
88. Safe Streets and Roads for All Grant Program
89. Sanitation Facilities Construction Program
90. Smart Grid Investment Grant Program
91. State Digital Equity Planning Program
92. State of Good Repair Grants
93. Strengthening Mobility and Revolutionizing Transportation Grants Program
94. Superfund Hazardous Substance Research and Training Program
95. Transmission Facilitation Program
96. Tribal Broadband Connectivity Program
97. Tribal Climate Resilience
98. Tribal Climate Resilience Annual Awards Program
99. Tribal Electrification Program
100. Tribal Energy Financing Program
101. Underground Injection Control Grants
102. University Transportation Centers Program
103. Watershed and Flood Prevention Operations Program
104. Watershed Rehabilitation Program
105. WaterSMART Water and Energy Efficiency Grants
Baseline Vulnerability – Environment

1. Air Pollution Monitoring
2. Battery and Critical Mineral Recycling
3. Battery Manufacturing and Recycling Grants
4. Brownfield Grant Funding
5. Brownfield Job Training Grants
6. Clean Heavy-Duty Vehicle Program
7. Clean Ports Program
8. Clean School Bus Program
9. Clean Vehicle Program
10. Clean Water State Revolving Fund
11. Climate Pollution Reduction Grants
12. Competitive grants for non-federal forest landowners
13. Consumer Electronics Battery Recycling, Reprocessing, and Battery Collection
14. Diesel Emissions Reduction Act Program
15. Electric Drive Vehicle Battery Recycling and Second-Life Applications Program
16. Environmental and Climate Justice Grants
   a. Environmental and Climate Justice (ECJ) Grant Program
   b. Environmental Justice Thriving Communities Grantmaking (EJ TCGM) Program
   c. Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program
   d. Environmental Justice Government-to-Government (EJG2G) Program
17. Funding to Address Air Pollution at Schools
18. Greenhouse Gas Reduction Fund
   a. National Clean Investment Fund
   b. Clean Communities Investment Accelerator
   c. Solar for All
19. Joint Chiefs' Landscape Restoration Partnership Program
20. Joint Fire Science Program
21. Lithium-Ion Battery Recycling Prize Competition
22. Methane Emissions Reduction Program
23. Natural Gas Distribution Infrastructure Safety and Modernization Grant Program
24. Orphan Well Site Plugging, Remediation, and Restoration Programs
   a. Orphaned Well Site Plugging, Remediation, And Restoration Program
   b. Federal Orphaned Well Program
   c. Orphaned Wells on Tribal Lands
25. Reduction of Truck Emissions at Port Facilities Program
26. Superfund Hazardous Substance Research and Training Program
27. Underground Injection Control Grants

Climate Change Impacts

1. Building Resilient Infrastructure and Communities
2. Carbon Capture Demonstration Program
3. Carbon Dioxide Transportation Infrastructure Finance and Innovation Program
4. Carbon Storage Validation and Testing Program
5. Carbon Utilization Program
6. Climate Change Technical Assistance Program
7. Climate Pollution Reduction Grants
8. Competitive Grants for Non-Federal Forest Landowners
9. Community Wildfire Defense Grants
10. Drinking Water System Infrastructure Resilience and Sustainability Program
11. Emergency Drought Relief for Tribes
12. Emergency Watershed Protection Program
13. Energy Infrastructure Reinvestment Program
14. Environmental and Climate Justice Grants
    a. Environmental and Climate Justice (ECJ) Grant Program
    b. Environmental Justice Thriving Communities Grantmaking (EJ TCGM) Program
    c. Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program
    d. Environmental Justice Government-to-Government (EJG2G) Program
15. Federal Emergency Management Agency Preparedness Grants
17. Flood Mitigation Assistance (FMA) Grant Program
18. Green and Resilient Retrofit Program
19. Greenhouse Gas Reduction Fund
    a. National Clean Investment Fund
    b. Clean Communities Investment Accelerator
    c. Solar for All
20. Hazard Mitigation Assistance Grants
21. Methane Emissions Reduction Program
22. National Dam Safety Program (NDSP) State Assistance Grant Program
23. National Earthquake Hazards Reduction Program's State Assistance Program
24. National Flood Insurance Program
25. Native Hawaiian Climate Resilience Program
26. Preventing Outages and Enhancing the Resilience of the Electric Grid Grants program
27. Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation Program
28. Safeguarding Tomorrow Revolving Loan Fund Program
29. Tribal Climate Resilience
30. Tribal Climate Resilience Annual Awards Program
31. Underground Injection Control Grants
32. Watershed and Flood Prevention Operations Program

Additional Region-Specific Funding

Funding Trackers and Guides

For Researchers
Baseline Vulnerability – Health

**Brownfield Grant Funding**
Provides direct funding for brownfields assessment, cleanup, revolving loans, environmental job training, technical assistance, training, and research.

Back to Contents

**Brownfield Job Training Grants**
Recruits, trains, and places local, unemployed and under-employed residents with the skills needed to secure full-time employment in the environmental sector, including nonprofit organizations.

Back to Contents

**Clean Ports Program**
Provides $3 billion to reduce air pollutants at U.S. ports by funding zero-emission port equipment and technology and helping ports develop climate action plans.

Back to Contents

**Clean School Bus Program**
Provides $5 billion over the next five years (2022-2026) to replace existing school buses with zero-emission and low-emission models.

Back to Contents

**Clean Water State Revolving Fund**
Provides low-cost financing to communities for a wide range of water quality infrastructure projects, including municipal wastewater facilities, nonpoint source pollution control, decentralized wastewater treatment systems, stormwater runoff mitigation, green infrastructure, estuary protection, and water reuse.

Back to Contents

**Diesel Emissions Reduction Act Program**
Funds grants and rebates that protect human health and improve air quality by reducing harmful emissions from diesel engines.

Back to Contents

**Distance Learning and Telemedicine Grants**
Helps rural communities overcome the effects of remoteness and low population density by enabling them to use advanced telecommunications technology to connect to each other – and the world. Through this competitive grant application process, applicants are encouraged to consider projects that
promote equity and economic opportunity in rural America, specifically those that advance these key priorities:

- Supporting health care needs stemming from the COVID-19 pandemic and helping prepare for future pandemic events
- Ensuring racial equity
- Rebuilding our rural economy
- Addressing the climate crisis

Drinking Water State Revolving Fund
Helps water systems and states to achieve the health protection objectives of the Safe Drinking Water Act by providing low interest loans to eligible recipients for drinking water infrastructure projects. As money is paid back into the state’s revolving loan fund, the state makes new loans to other recipients.

Environmental and Climate Justice Grants

Environmental and Climate Justice (ECJ) Grant Program
Provides $2.8 billion for financial assistance and $200 million for technical assistance to carry out environmental and climate justice activities to benefit underserved and overburdened communities. EPA must award grants and technical assistance under the ECJ Program by September 30, 2026.

Environmental Justice Thriving Communities Grantmaking (EJ TCGM) Program
Selects multiple grantmakers around the nation to reduce barriers to the federal grants application process communities face and increase the efficiency of the awards process for environmental justice grants. Grantmakers will design competitive application and submission processes, award environmental justice subgrants, implement a tracking and reporting system, provide resources and support to communities, all in collaboration with EPA’s Office of Environmental Justice and External Civil Rights.

Environmental Justice Collaborative Problem-Solving (EJCPs) Cooperative Agreement Program
Provides financial assistance to eligible organizations working to address local environmental or public health issues in their communities. The program assists recipients in building collaborative partnerships with other stakeholders (e.g., local businesses and industry, local government, medical service providers, academia, etc.) to develop solutions to environmental or public health issue(s) at the community level.

Environmental Justice Government-to-Government (EJG2G) Program
Provides funding at the state, local, territorial, and tribal level to support government activities that lead to measurable environmental or public health impacts in communities disproportionately burdened by environmental harms. Model EJG2G programs should leverage existing resources to develop processes or tools that integrate environmental justice considerations into governmental decision-making at all levels. Formerly known as EPA’s State Environmental Justice Cooperative Agreement Program, this program has been renamed to better reflect the spectrum of entities eligible for this funding.
**Home Energy Rebate Programs**

Provides $4.3 billion to states to develop and implement a Home Owner Managing Energy Savings rebate program as well as $4.275 billion to states and $225 to tribes to develop and implement High-Efficiency Electric Home Rebate programs. Both programs are intended to help households save money on energy bills, upgrade to clean energy equipment, improve energy efficiency, and reduce indoor and outdoor air pollution.

**Orphan Well Site Plugging, Remediation, and Restoration Programs**

- **Orphaned Well Site Plugging, Remediation, And Restoration Program**
  Provides funding from the U.S. Department of Energy's Office of Fossil Energy and Carbon Management to plug wells on federal land and issue grants to states and tribes on state, private, and tribal land.

  - **Federal Orphaned Well Program**
    Led by the U.S. Department of the Interior (DOI)'s Bureau of Land Management, provides IIJA historic investments to help revitalize local economies and support jobs, while addressing environmental impacts from legacy developments. This multi-agency effort to remediate orphaned wells on federal lands includes DOI Land Management Agencies, the U.S. Forest Service, Department of Energy, Environmental Protection Agency, and the Interstate Oil & Gas Commission Compact.

  - **Orphaned Wells on Tribal Lands**
    Provides up to $150 million in federal IIJA funding for the purpose of plugging orphaned wells and remediating and reclaiming orphaned well sites on tribal lands. Tribes may seek funding to undertake the well plugging or may request that the Secretary administer the well plugging on behalf of the tribe.

**Reduction of Truck Emissions at Port Facilities Program**

Provides funding to reduce truck idling and emissions at ports, including through the advancement of port electrification. Eligible uses include projects that test, evaluate, and deploy projects that reduce port-related emissions from idling trucks, including through port operations efficiency improvements.

**Renew America’s Schools**

Provides U.S. Department of Energy with $500 million in IIJA funding to promote the implementation of clean energy improvements at K-12 public schools across the country, aiming to help school communities make energy upgrades that will lower utilities costs, improve indoor air quality, and foster healthier learning environments.
**Renew America’s Nonprofits Program**
Provides U.S. Department of Energy IIJA funding for energy-efficiency improvements in the nonprofit sector to reduce carbon emissions, improve health and safety, and lower utilities costs at buildings owned and operated by 501(c)(3) nonprofits, allowing critical funds to be redirected to mission-focused work. This program is also referred to the IIJA as the Energy Efficiency Materials Pilot program.

**Sanitation Facilities Construction Program**
Provides funding to build infrastructure necessary to ensure a safe supply of drinking water, reliable sewage systems, and solid waste disposal facilities. This program is responsible for the delivery of environmental engineering services and sanitation facilities to American Indians and Alaska Natives. It is administered by the Indian Health Service Division of Sanitation Facilities Construction and accomplishes its responsibilities through the allocation of available resources to the twelve Indian Health Service area offices.

**Superfund Hazardous Substance Research and Training Program**
Led by the National Institute of Environmental Health Sciences, supports problem-based, solution-oriented Superfund Research Program Centers that consist of multiple, integrated projects representing both the biomedical and environmental science and engineering disciplines; as well as cores tasked with administrative (which includes research translation), data management and analysis, community engagement, research experience and training coordination, and research support functions.

**Underground Injection Control Grants**
Provides funding for grants aimed at developing and implementing training programs that protect drinking water sources. The U.S. EPA’s Office of Water is inviting states, tribes, and territories to submit letters of intent to indicate their interest in the new grant program.

**Baseline Vulnerability – Social & Economic**
**Affordable Connectivity Program**
Helps ensure households can afford the broadband needed for work, school, healthcare, and more by providing a discount of up to $30 per month toward internet service for eligible households and up to $75 per month for households on qualifying tribal lands. Through this Federal Communications Commission benefit program, eligible households can also receive a one-time discount of up to $100 to
purchase a laptop, desktop computer, or tablet from participating providers if they contribute more than $10 and less than $50 toward the purchase price.

Back to Contents

**Building Codes Implementation for Efficiency and Resilience Program**
Enables sustained, cost-effective implementation of updated building energy codes to save customers money on their energy bills through a competitive grant process.

Back to Contents

**Building Resilient Infrastructure and Communities**
Supports states, local communities, tribes, and territories as they undertake hazard mitigation projects, reducing the risks they face from disasters and natural hazards. The IIJA provides $1 billion over five years, which is in addition to the funding the Federal Emergency Management Agency provides through setting aside up to 6% of the assistance the agency provides following major disaster declarations through the Public Assistance and Individuals and Households Program.

Back to Contents

**Building, Training, and Assessment Centers**
Provides grants to institutions of higher education to establish building training and assessment centers (BTACs) to educate and train students and building performance professionals to deploy modern building technologies to small businesses and K-12 schools. BTACs fund institutions of higher education, like community colleges and universities, to prepare a diverse and equitable workforce in order to lower the U.S. carbon footprint.

Back to Contents

**Career Skills Training**
Provides grants to pay the federal share of career skills training programs under which students concurrently receive classroom instruction and on-the-job training for the purpose of obtaining an industry-related certification to install energy efficient building technologies.

Back to Contents

**Clean Energy Production Tax Credit and Clean Electricity Investment Credit**
Replaces the traditional Clean Energy Production Tax Credit and traditional Clean Energy Investment Tax Credit with those outlined in IRA starting January 1, 2025 – applying to all generation facilities (and energy storage systems under Investment Tax Credit) that have an anticipated greenhouse gas emissions rate of zero. The credit amount is generally calculated in the same manner as described above but will be phased out as the U.S. meets greenhouse gas emission reduction targets.

Back to Contents
Clean Vehicle Credit
The U.S. Internal Revenue Service provides resources on how to determine eligibility for clean vehicle credits and how to claim them:

- Credits for New Electric Vehicles Purchased in 2023 or After
- Credits for New Electric Vehicles Purchased in 2022 or Before
- Used Electric Vehicle Credit
- Commercial Clean Vehicle Credit
- Clean Vehicle Credit Qualified Manufacturer Requirements
- Clean Vehicle Credit Dealer Requirements
- Excise Tax Credits for Alternative Fuels, Biodiesel, and Renewable Diesel

Competitive Grants for Non-Federal Forest Landowners
Provides $550 million for competitive grants to non-federal forest landowners to help sustain healthy and resilient working forests. The funding prioritizes underserved and small forest landowners in carrying out climate mitigation and forest resilience efforts.

Discrimination Financial Assistance Program for Farmers, Ranchers, and Forest Landowners
Provides $2.2 billion in financial assistance for farmers who have experienced discrimination in the United States Department of Agriculture’s farm lending programs.

Energy Efficiency and Conservation Block Grant Program
Assists states, local governments, and tribes in implementing strategies to reduce energy use, cut fossil fuel emissions, and improve energy efficiency.

Energy Infrastructure Reinvestment Program
Guarantees loans to projects that retool, repower, repurpose, or replace energy infrastructure that has ceased operations, or enable operating energy infrastructure to avoid, reduce, utilize, or sequester air pollutants or anthropogenic emissions of greenhouse gases.

Emergency Food and Shelter Program
Supplements and expands ongoing work of local nonprofit and governmental social service organizations to provide shelter, food, and supportive services to individuals and families who are experiencing, or at risk of experiencing, hunger and/or homelessness. The program may also receive
funding to award to the National Board for distribution to local social service organizations that provide humanitarian relief to families and individuals encountered by the Department of Homeland Security.

Back to Contents

**Empowering Rural America New ERA Program**
Provides $9.7 billion to help rural Americans transition to clean, affordable, and reliable energy. By reducing air and water pollution, New ERA funding improves health outcomes and lower energy costs for people in rural communities. New ERA program funding is available to member-owned rural electric cooperatives, which have been the backbone of America’s rural power delivery for nearly a century.

Back to Contents

**Federal Income Tax Credits and Incentives for Energy Efficiency**
Provides federal tax credits and deductions that enable Americans to make homes and buildings more energy-efficient to help reduce energy costs while reducing demand as we transition to cleaner energy sources. Guidance is given to homeowners, home builders, and commercial building owners.

Back to Contents

**Federal Emergency Management Agency Public Assistance Program**
Provides supplemental grants to state, tribal, territorial, and local governments, and certain types of private non-profits, so communities can quickly respond to and recover from major disasters or emergencies. The U.S. Federal Emergency Management Agency also encourages protecting these damaged facilities from future events by providing assistance for hazard mitigation measures during the recovery process.

Back to Contents

**Flood Mitigation Assistance Grant Program**
Provides $3.5 billion in Flood Mitigation Assistance grants to states, local communities, tribes, and territories over five years - $700 million per year from 2022 to 2026. Reduces or eliminates the risk of repetitive flood damage to buildings insured under the National Flood Insurance Program.

Back to Contents

**Green and Resilient Retrofit Program**
Provides funding for direct loans and grants to fund projects that improve energy or water efficiency, enhance indoor air quality or sustainability, implement the use of zero-emission electricity generation, low-emission building materials or processes, energy storage, or building electrification strategies, or address climate resilience, of eligible Department of Housing and Urban Development (HUD)-assisted multifamily properties. There is also funding available under this provision for HUD’s benchmarking initiative that will finance Energy and Water benchmarking of HUD-assisted properties to measure usage and efficiency of those properties.

Back to Contents
**Hazard Mitigation Assistance Grants**
Provides funding for eligible mitigation measures that reduce disaster losses. "Hazard mitigation" is any sustainable action that reduces or eliminates long-term risk to people and property from future disasters.

Back to Contents

**Home Efficiency Rebates**
Awards grants to state energy offices to provide rebates that discount the price of energy-saving retrofits in single-family and multi-family buildings.

Back to Contents

**Home Electrification and Appliance Rebates**
Awards grants to state energy offices and tribal entities to develop and implement a high-efficiency electric home rebate program.

Back to Contents

**Home Energy Rebate Programs**
Provides $4.3 billion to states to develop and implement a Home Owner Managing Energy Savings rebate program as well as $4.275 billion to states and $225 to Indian Tribes to develop and implement High-Efficiency Electric Home Rebate programs. Both programs are intended to help households save money on energy bills, upgrade to clean energy equipment, improve energy efficiency, and reduce indoor and outdoor air pollution.

Back to Contents

**Low Income Home Energy Assistance**
Provides federally funded assistance to reduce the costs associated with home energy bills, energy crises, weatherization, and minor energy-related home repairs and the risks of health and safety problems that arise from unsafe heating and cooling situations and practices.

Back to Contents

**National Flood Insurance Program**
Provides flood insurance to property owners, renters and businesses, and works with communities required to adopt and enforce floodplain management regulations that help mitigate flooding effects. Flood insurance is available to anyone living in one of the almost 23,000 participating National Flood Insurance Program communities, helping them recover faster when floodwaters recede. Homes and businesses in high-risk flood areas with mortgages from government backed lenders are required to have flood insurance.

Back to Contents
Orphan Well Site Plugging, Remediation, and Restoration Programs

**Orphaned Well Site Plugging, Remediation, And Restoration Program**
Provides funding from the U.S. Department of Energy’s Office of Fossil Energy and Carbon Management to plug wells on federal land and issue grants to states and tribes on state, private, and tribal land.

**Federal Orphaned Well Program**
Led by the U.S. Department of the Interior (DOI)’s Bureau of Land Management, provides IIJA historic investments to help revitalize local economies and support jobs, while addressing environmental impacts from legacy developments. This multi-agency effort to remediate orphaned wells on federal lands includes DOI Land Management Agencies, the U.S. Forest Service, Department of Energy, Environmental Protection Agency, and the Interstate Oil & Gas Commission Compact.

**Orphaned Wells on Tribal Lands**
Provides up to $150 million in federal IIJA funding for the purpose of plugging orphaned wells and remediating and reclaiming orphaned well sites on tribal lands. Tribes may seek funding to undertake the well plugging or may request that the Secretary administer the well plugging on behalf of the tribe.

Back to Contents

**Reconnecting Communities and Neighborhoods Program**
Combines the Reconnecting Communities Pilot and Neighborhood Access and Equity programs, two major discretionary grants into one funding opportunity. The programs will:

- Prioritize disadvantaged communities;
- Improve access to daily needs such as jobs, education, healthcare, food, and recreation;
- Foster equitable development and restoration;
- Reconnect communities by removing, retrofitting, or mitigating highways or other transportation facilities that create barriers to community connectivity, including to mobility, access, or economic development.

**Neighborhood Access and Equity Grant Program**
Provides funds for projects that improve walkability, safety, and affordable transportation access through context-sensitive strategies and address existing transportation facilities that create barriers to community connectivity or negative impacts on the human or natural environment, especially in disadvantaged or underserved communities. The program also provides funding for planning and capacity building activities in disadvantaged or underserved communities as well as funding for technical assistance to units of local government to facilitate efficient and effective contracting, design, and project delivery and to build capacity for delivering surface transportation projects.

**Reconnecting Communities Pilot Program**
Provides $1 billion in IRA funding over five years from 2022-2026. The program aims to reconnect communities by removing, retrofitting, or mitigating transportation facilities, like highways or rail lines, that create barriers to community connectivity, mobility, access, or economic development.
Residential Clean Energy Credit
Equals 30% of the costs of new, qualified clean energy property for a home installed anytime from 2022 through 2033. Individuals may be able to take the credit if they made energy-saving improvements to homes located in the United States.

Safeguarding Tomorrow Revolving Loan Fund Program
Provides capitalization grants to states, eligible federally recognized tribes, territories, and the District of Columbia to establish revolving loan funds that provide hazard mitigation assistance for local governments to reduce risks from natural hazards and disasters.

USDA Funds for Financially Distressed Borrowers
Provides $3.1 billion for the U.S. Department of Agriculture (USDA) to provide relief for distressed borrowers with certain Farm Service Agency direct and guaranteed loans. The law directs USDA to expedite assistance for those borrowers whose agricultural operations are at financial risk. More information will be posted to this webpage as it becomes available.

Weatherization Assistance Program
Reduces energy costs for low-income households by increasing the energy efficiency of their homes, while ensuring health and safety. It is the nation’s single largest residential whole-house energy efficiency program. See here for more details on how to apply through your state weatherization agency.

Baseline Vulnerability – Infrastructure
Active Transportation Infrastructure Investment Program
Supports planning and active transportation implementation (mobility options powered primarily by human energy, including bicycling and walking) at the network scale, rather than on a project-by-project basis. The Active Transportation Infrastructure Investment Program awards competitive grants to plan, design, and construct networks of safe and connected active transportation facilities that connect between destinations within a community or metropolitan region. Additionally, grants may fund projects to plan, design, and construct an active transportation spine, a facility that connects communities, metropolitan regions, or states.
**Advanced Battery R&D Consortium**
Provides up to $60 million to convene major manufacturers of electric drive vehicles in the U.S., universities, National Laboratory partners, mineral and material suppliers, and other key battery stakeholders to address critical battery needs for the next phase of widespread electric vehicle commercialization.

Back to Contents

**Advanced Energy Manufacturing and Recycling Grant Program**
Provides grants to small- and medium-sized manufacturers to enable them to build new or retrofit existing manufacturing and industrial facilities to produce or recycle advanced energy products in communities where coal mines or coal power plants have closed.

Back to Contents

**Affordable Connectivity Program**
Helps ensure households can afford the broadband needed for work, school, healthcare, and more by providing a discount of up to $30 per month toward internet service for eligible households and up to $75 per month for households on qualifying tribal lands. Through this Federal Communications Commission benefit program, eligible households can also receive a one-time discount of up to $100 to purchase a laptop, desktop computer, or tablet from participating providers if they contribute more than $10 and less than $50 toward the purchase price.

Back to Contents

**Airport Terminal Program**
Provides $5 billion in competitive grants for airport terminal development projects that address the aging infrastructure of the nation’s airports, including multimodal development. These grants will fund safe, sustainable and accessible airport terminals, on-airport rail access projects and airport-owned airport traffic control towers.

Back to Contents

**All Stations Accessibility Program**
Makes competitive funding available to assist in the financing of capital projects to repair, improve, modify, retrofit, or relocate infrastructure of stations or facilities for passenger use. Eligible activities are capital projects to upgrade the accessibility of legacy rail fixed guideway public transportation systems for people with disabilities, including those who use wheelchairs, by increasing the number of existing stations or facilities for passenger use.

Back to Contents

**Battery Manufacturing and Recycling Grants**
Provides grants to ensure that the U.S. has a viable domestic manufacturing and recycling capability to support a North American battery supply chain.
Battery Material Processing Grants
Provides grants for battery materials processing to ensure that the United States has a viable battery materials processing industry. Funds can also be used to expand domestic capabilities in battery manufacturing and enhance processing capacity.

Bioproduct Pilot Program
Directs the USDA to partner with no less than one qualified institution to support the scale-up of sustainable bioproduct manufacturing, with the goal of providing a low-cost alternative to conventional products. Up to $5 million is available for 2022 and 2023.

Bridge Investment Program
Provides funding, which focuses on existing bridges, to reduce the overall number of bridges in poor condition, or in fair condition at risk of falling into poor condition. It also expands applicant eligibilities to create opportunity for all levels of government to be direct recipients of program funds. Alongside states and federal lands management agencies, metropolitan planning organizations and local and tribal governments can also apply directly to Federal Highway Administration, making it easier to advance projects at the local level that meet community needs.

Broadband Equity, Access, and Deployment Program
Provides $42.45 billion to expand high-speed internet access by funding planning, infrastructure deployment, and adoption programs in all 50 states, Washington D.C., Puerto Rico, the U.S. Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.

Building Codes Implementation for Efficiency and Resilience Program
Enables sustained, cost-effective implementation of updated building energy codes to save customers money on their energy bills through a competitive grant process.

Building, Training, and Assessment Centers
Provides grants to institutions of higher education to establish building training and assessment centers (BTACs) to educate and train students and building performance professionals to deploy modern building technologies to small businesses and K-12 schools. BTACs fund institutions of higher education,
like community colleges and universities, to prepare a diverse and equitable workforce in order to lower the U.S. carbon footprint.

Back to Contents

**Capital Investment Grants Program**
Funds transit capital investments, including heavy rail, commuter rail, light rail, streetcars, and bus rapid transit through this Federal Transit Authority discretionary grant. Federal transit law requires transit agencies seeking capital investment grant funding to complete a series of steps over several years.

Back to Contents

**Carbon Capture Demonstration Program**
Provides $2.5 billion to develop six carbon capture facilities to significantly improve the efficiency, effectiveness, costs, emissions reductions, and environmental performance of coal and natural gas use. This program will focus on integrated carbon capture, transport, and storage technologies and infrastructure that can be readily replicated and deployed at fossil energy power plants and major industrial sources of carbon dioxide (CO2), such as cement, pulp and paper, iron and steel, and certain types of chemical production facilities.

Back to Contents

**Carbon Dioxide Transportation Infrastructure Finance and Innovation Program**
Finances projects that build shared (i.e., common carrier) transport infrastructure to move CO2 from points of capture to conversion facilities and/or storage wells. This CO2 transport infrastructure will provide economies of scale and help form an interconnected carbon management ecosystem in the United States.

Back to Contents

**Carbon Reduction Program**
Provides funds for projects designed to reduce transportation emissions, defined as CO2 emissions from on-road highway sources.

Back to Contents

**Carbon Storage Validation and Testing Program**
Establishes a program of research, development, and demonstration for carbon storage. Funds will be aimed at the development of new or expanded commercial large-scale carbon sequestration projects and associated carbon dioxide transport infrastructure, including funding for the feasibility, site characterization, permitting, and construction stages of project development.

Back to Contents
**Carbon Utilization Program**
Establishes a grant program for state and local governments to procure and use products derived from captured carbon oxides. An eligible entity shall use a grant to procure and use commercial or industrial products that use or are derived from anthropogenic carbon oxides and demonstrate significant net reductions in lifecycle greenhouse gas emissions compared to incumbent technologies, processes, and products.

Back to Contents

**Civil Nuclear Energy Program**
Provides $6 billion to owners and operators of commercial U.S. reactors that apply for certification to bid on credits to help preserve the existing U.S. reactor fleet.

Back to Contents

**Charging and Fueling Infrastructure Grant Program**
Provides funding to strategically deploy publicly accessible electric vehicle charging infrastructure and other alternative fueling infrastructure. This grant program aims to deploy electric vehicle charging and hydrogen/propane/natural gas fueling infrastructure along designated alternative fuel corridors. It also aims to install electric vehicle charging and alternative fuel in locations on public roads, schools, parks, and in publicly accessible parking facilities. Community Charging grants will prioritize rural areas and low- and moderate-income neighborhoods with low ratios of private parking or high ratios of multiunit dwellings.

Back to Contents

**Clean Energy Demonstration Program on Current and Former Mine Land**
Provides funding to demonstrate the technical and economic viability of deploying clean energy on current (operating) and former (abandoned or inactive) mine land. Up to five clean energy projects will be carried out in geographically diverse regions, at least two of which must be solar projects. These demonstration projects are expected to be replicable, providing knowledge and experience that catalyze the next generation of clean energy on mine land projects.

Back to Contents

**Clean Heavy-Duty Vehicle Program**
Provides $1 billion to replace dirty heavy-duty vehicles with clean, zero-emission vehicles, support zero-emission vehicle infrastructure, and to train and develop workers. The U.S. Environmental Protection Agency (EPA) will be distributing this $1 billion in funding for clean heavy-duty vehicles between now and 2031 and $400 million will be going to communities in nonattainment areas. EPA anticipates this new funding opportunity may begin later in 2023.

Back to Contents
Clean Hydrogen Electrolysis
Establishes a research, development, demonstration, commercialization, and deployment program for purposes of commercialization to improve the efficiency, increase the durability, and reduce the cost of producing clean hydrogen using electrolyzers.

Clean Hydrogen Manufacturing Recycling Program
Provides federal financial assistance to advance new clean hydrogen production, processing, delivery, storage, and use equipment manufacturing technologies and techniques.

Clean Ports Program
Provides $3 billion to reduce air pollutants at U.S. ports by funding zero-emission port equipment and technology and helping ports develop climate action plans.

Clean School Bus Program
Provides $5 billion over the next five years (2022-2026) to replace existing school buses with zero-emission and low-emission models.

Clean Vehicle Credit
The U.S. Internal Revenue Service provides resources on how to determine eligibility for clean vehicle credits and how to claim them:

- Credits for New Electric Vehicles Purchased in 2023 or After
- Credits for New Electric Vehicles Purchased in 2022 or Before
- Used Electric Vehicle Credit
- Commercial Clean Vehicle Credit
- Clean Vehicle Credit Qualified Manufacturer Requirements
- Clean Vehicle Credit Dealer Requirements
- Excise Tax Credits for Alternative Fuels, Biodiesel, and Renewable Diesel

Clean Water State Revolving Fund
Provides low-cost financing to communities for a wide range of water quality infrastructure projects, including municipal wastewater facilities, nonpoint source pollution control, decentralized wastewater treatment systems, stormwater runoff mitigation, green infrastructure, estuary protection, and water reuse.
Climate Change Technical Assistance Program
Provides $15 million for the Office of Insular Affairs to provide technical assistance for climate change planning, mitigation, adaptation, and resilience to United States Insular Areas Governments. The Insular Areas include American Samoa, the Commonwealth of the Northern Mariana Islands, Guam, Puerto Rico, and the U.S. Virgin Island. Use CFDA# 15.875

Back to Contents

Commercial Direct Air Capture Technology Prize Competition
Awards prizes under the prize competition to qualified direct air capture facilities for metric tons of qualified carbon dioxide captured and verified at the point of disposal, injection, or utilization.

Back to Contents

Consolidated Rail Infrastructure and Safety Improvements Program
Funds projects that improve the safety, efficiency, and reliability of intercity passenger and freight rail. Projects eligible for funding under this grant program include, but are not limited to: deployment of railroad safety technology; capital projects for intercity passenger rail service, except that a project is not required to be in a state rail plan; capital projects that address congestion challenges affecting rail service/reduce congestion and facilitate ridership growth along heavily traveled rail corridors/improve short-line or regional railroad infrastructure; highway-rail grade crossing improvement projects; rail line relocation and improvement projects; regional rail and corridor service development plans and environmental analyses; any project necessary to enhance multimodal connections or facilitate service integration between rail service and other modes and more.

Back to Contents

Cybersecurity For the Energy Sector Research, Development, And Demonstration Program
Supports development and deployment of advanced cyber applications, technologies, and threat collaboration efforts with the U.S. energy sector.

Back to Contents

Diesel Emissions Reduction Act Program
Funds grants and rebates that protect human health and improve air quality by reducing harmful emissions from diesel engines.

Back to Contents

Discrimination Financial Assistance Program for Farmers, Ranchers, and Forest Landowners
Provides $2.2 billion in financial assistance for farmers who have experienced discrimination in USDA’s farm lending programs.
**Distance Learning and Telemedicine Grants**
Helps overcome the effects of remoteness and low population density by enabling rural communities to use advanced telecommunications technology to connect to each other – and the world. Through this competitive grant application process, applicants are encouraged to consider projects that promote equity and economic opportunity in rural America, specifically those that advance these key priorities:

- Supporting health care needs stemming from the COVID-19 pandemic and helping prepare for future pandemic events
- Ensuring racial equity
- Rebuilding our rural economy
- Addressing the climate crisis

**Drinking Water State Revolving Fund**
Helps water systems and states to achieve the health protection objectives of the Safe Drinking Water Act by providing low interest loans to eligible recipients for drinking water infrastructure projects. As money is paid back into the state’s revolving loan fund, the state makes new loans to other recipients.

**Drinking Water System Infrastructure Resilience and Sustainability Program**
Awards grants to assist underserved, small, and disadvantaged communities to increase drinking water facility resilience to natural hazards.

**Electric or Low-Emitting Ferry Pilot Program**
Provides competitive funding for projects that support the purchase of electric or low-emitting ferries and the electrification of or other reduction of emissions from existing ferries. Eligible are capital projects that include the purchase of electric or low-emitting ferry vessels that reduce emissions by using alternative fuels or on-board energy storage systems and related charging infrastructure to reduce emissions or produce zero onboard emissions under normal operation.

**Empowering Rural America New ERA Program**
Provides $9.7 billion to member-owned rural electric cooperatives to help rural Americans transition to clean, affordable, and reliable energy. By reducing air and water pollution, New ERA funding improves health outcomes and lowers energy costs for people in rural communities.
Energy Auditor Training Grant Program
Provides grants to eligible states to train individuals to conduct energy audits or surveys of commercial and residential buildings to build the clean energy workforce, save customers money on their energy bills, and reduce pollution from building energy use.

Back to Contents

Energy Efficiency and Conservation Block Grant Program
Assists states, local governments, and tribes in implementing strategies to reduce energy use, to reduce fossil fuel emissions, and to improve energy efficiency.

Back to Contents

Energy Efficiency Revolving Loan Fund Capitalization Grant Program
Provides capitalization grants to states to establish a revolving loan fund under which the state shall provide loans and grants for energy efficiency audits, upgrades, and retrofits to increase energy efficiency and improve the comfort of buildings.

Back to Contents

Energy Infrastructure Reinvestment Program
Guarantees loans to projects that retool, repower, repurpose, or replace energy infrastructure that has ceased operations, or enable operating energy infrastructure to avoid, reduce, utilize, or sequester air pollutants or anthropogenic emissions of greenhouse gases.

Back to Contents

Energy Sector Operational Support for Cyber Resilience Program
Designed to support a program that builds energy sector operational support for cyber resilience. Eligible uses include:
- Enhance and periodically test:
  - The emergency response capabilities of the Department of Energy (DOE); and
  - The coordination of DOE with other agencies, the National Laboratories, and private industry;
- Expand cooperation of DOE with the intelligence community for energy sector-related threat collection and analysis;
- Enhance the tools of the Department and Electricity Information Sharing and Analysis Center for monitoring the status of the energy sector;
- Expand industry participation in Electricity Information Sharing and Analysis Center; and
- Provide technical assistance to small electric utilities to assess and improve cyber maturity levels and address gaps identified in the assessment.

Back to Contents
**Energy Storage Demonstration and Pilot Grant Program**
Enters into agreements to carry out three energy storage system demonstration projects in the U.S.

**Enhanced Mobility of Seniors & Individuals with Disabilities**
Provides formula funding to states and designated recipients to meet the transportation needs of older adults and people with disabilities when the transportation service provided is unavailable, insufficient, or inappropriate to meet these needs. Funds are apportioned based on each state’s share of the population for these two groups. Formula funds are apportioned to direct recipients; for rural and small urban areas, this is the state Department of Transportation, while in large urban areas, a designated recipient is chosen by the governor.

**Environmental and Climate Justice Grants**

**Environmental and Climate Justice (ECJ) Grant Program**
Provides $2.8 billion for financial assistance and $200 million for technical assistance to carry out environmental and climate justice activities to benefit underserved and overburdened communities. EPA must award grants and technical assistance under the ECJ Program by September 30, 2026.

**Environmental Justice Thriving Communities Grantmaking (EJ TCGM) Program**
Selects multiple grantmakers around the nation to reduce barriers to the federal grants application process communities face and increase the efficiency of the awards process for environmental justice grants. Grantmakers will design competitive application and submission processes, award environmental justice subgrants, implement a tracking and reporting system, provide resources and support to communities, all in collaboration with EPA’s Office of Environmental Justice and External Civil Rights.

**Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program**
Provides financial assistance to eligible organizations working to address local environmental or public health issues in their communities. The program assists recipients in building collaborative partnerships with other stakeholders (e.g., local businesses and industry, local government, medical service providers, academia, etc.) to develop solutions to environmental or public health issue(s) at the community level.

**Environmental Justice Government-to-Government (EJG2G) Program**
Provides funding at the state, local, territorial, and tribal level to support government activities that lead to measurable environmental or public health impacts in communities disproportionately burdened by environmental harms. Model EJG2G programs should leverage existing resources to develop processes or tools that integrate environmental justice considerations into governmental decision-making at all levels. Formerly known as EPA’s State Environmental Justice Cooperative Agreement Program, this program has been renamed to better reflect the spectrum of entities eligible for this funding.
Federal-State Partnership for Intercity Passenger Rail Grant Program
Provides funding for capital projects that reduce the State of Good Repair backlog, improve performance, or expand or establish new intercity passenger rail service, including privately operated intercity passenger rail service, if an eligible applicant is involved.

Ferry Boat Program
Provides federal-aid highway funds, through the state transportation agencies, for designing and constructing ferry boats and for designing, acquiring right-of-way, constructing ferry terminal facilities, including ferry maintenance facilities, and other activities. Ferry boats and terminal facilities that serve vehicular travel as links on public highways (other than Interstate highways), as well as ferry boats and terminals only serving passengers as a fixed route transit facility, may be eligible for certain types of federal-aid highway funding.

Ferry Service for Rural Communities
Provides competitive funding to states to ensure basic ferry service is provided to rural areas. Eligible activities include capital, planning, and operating assistance for a ferry service that operated a regular schedule at any time during the five-year period ending March 1, 2020, and served not less than two rural areas located more than 50 sailing miles apart. Funding is also available for ferry services that serve at least two rural areas with a single segment over 20 miles between them not otherwise eligible for funding under the Passenger Ferry Program.

Funding to address air pollution at schools
Provides $37.5 million for grants and other activities to monitor and reduce air pollution and greenhouse gas emissions at schools in low-income and disadvantaged communities, and $12.5 million for technical assistance to address environmental issues, develop school environmental quality plans, identify, and mitigate ongoing air pollution hazards.

Green and Resilient Retrofit Program
Provides funding for direct loans and grants to fund projects that improve energy or water efficiency, enhance indoor air quality or sustainability, implement the use of zero-emission electricity generation, low-emission building materials or processes, energy storage, or building electrification strategies, or address climate resilience, of eligible Department of Housing and Urban Development (HUD)-assisted multifamily properties. There is also funding available under this provision for HUD’s benchmarking initiative that will finance Energy and Water benchmarking of HUD-assisted properties to measure usage and efficiency of those properties.
**Grid Innovation Program**
Provides federal financial assistance to governmental entities to coordinate and collaborate with electric sector owners and operators to demonstrate innovative approaches to transmission, storage, and distribution infrastructure to harden and enhance resilience and reliability; and to demonstrate innovative approaches to enhance regional grid resilience, implemented through states by public and rural electric cooperative entities on a cost-shared basis.

Back to Contents

**Home Efficiency Rebates**
Awards grants to state energy offices to provide rebates that discount the price of energy-saving retrofits in single-family and multi-family buildings.

Back to Contents

**Home Electrification and Appliance Rebates**
Awards grants to state energy offices and tribal entities to develop and implement a high-efficiency electric home rebate program.

Back to Contents

**Highway Safety Grants Program**
Awards grants for occupant protection, state traffic safety information systems, impaired driving countermeasures, distracted driving, motorcyclist safety, state graduated driver licensing laws, and non-motorized safety.

Back to Contents

**Highway Safety Improvement Program**
Provides federal aid to achieve a significant reduction in traffic fatalities and serious injuries on all public roads, including non-state-owned roads and roads on tribal land. The program requires a data-driven, strategic approach to improving highway safety on all public roads with a focus on performance.

Back to Contents

**Long-Duration Energy Storage Demonstrations**
Provides $505 million for the development of long-duration energy storage (LDES) demonstrations to validate new technologies and enhance the capabilities of customers and communities to integrate grid storage more effectively. The Department of Energy defines LDES as systems capable of delivering electricity for 10 or more hours in duration.

Back to Contents
**Low-Income Communities Bonus Credit Program**
Provides a boost of up to 20 percentage points to the investment tax credit for solar and wind energy projects in low-income communities. The program aims to increase clean energy facilities in low-income communities, encouraging new market participants, and benefitting individuals and communities that have experienced adverse environmental impacts or lacked economic opportunities. The Low-Income Communities Bonus Credit program will allocate 1.8 gigawatts of capacity available in 2023 across four categories for solar and wind projects with maximum output of less than five megawatts.

Back to Contents

**Low or No Emission Vehicle Program**
Provides funding to state and local governmental authorities for the purchase or lease of zero-emission and low-emission transit buses and acquisition, construction, and leasing of required supporting facilities.

Back to Contents

**Low Emissions Electricity Program**
Provides funding to reduce emissions from domestic energy generation and use, prioritizing underserved communities, through education, partnership, technical assistance, and outreach.

Back to Contents

**Maintaining and Enhancing Hydroelectricity Incentives**
Provides incentive payments to the owner or authorized operator of a qualified hydroelectric facility for capital improvements directly related to improving grid resilience (including the addition of energy storage such as reservoir capacity, pumped storage hydropower, and batteries), improving dam safety, and related to environmental improvements.

Back to Contents

**Middle Mile Grant Deployment**
Provides funding for the construction, improvement, or acquisition of middle mile infrastructure. The grant program's purpose is to expand and extend middle mile infrastructure to reduce the cost of connecting areas unserved or underserved to the internet backbone.

Back to Contents

**National Dam Safety Program State Assistance Grant Program**
Provides financial assistance to states for strengthening their dam safety programs. The states use National Dam Safety Program funds for the following types of activities:

- Dam safety training for state personnel
- Increase in the number of dam inspections
- Increase in the submittal and testing of Emergency Action Plans
- More timely review and issuance of permits
• Improved coordination with state emergency preparedness officials
• Identification of dams to be repaired or removed
• Conduct dam safety awareness workshops and creation of dam safety videos and other outreach materials

**National Earthquake Hazards Reduction Program's State Assistance Program**
Provides funds to increased and enhance the effective implementation of earthquake risk reduction at the local level, reducing the risks to people and property posed by natural hazards.

**National Electric Vehicle Infrastructure Formula Program**
Provides funding to states to strategically deploy electric vehicle (EV) charging stations and to establish an interconnected network to facilitate data collection, access, and reliability. Funding is available for up to 80% of eligible project costs, including:
• The acquisition, installation, and network connection of EV charging stations to facilitate data collection, access, and reliability;
• Proper operation and maintenance of EV charging stations; and,
• Long-term EV charging station data sharing

**National Flood Insurance Program**
Provides flood insurance to property owners, renters and businesses, and having this coverage helps them recover faster when floodwaters recede. NFIP works with communities required to adopt and enforce floodplain management regulations that help mitigate flooding effects. Flood insurance is available to anyone living in one of the almost 23,000 participating NFIP communities. Homes and businesses in high-risk flood areas with mortgages from government backed lenders are required to have flood insurance.

**National Priority Safety Program**
Provides grant funding to address selected national priorities for reducing highway deaths and injuries.

**Nationally Significant Multimodal Freight and Highway Projects**
Awards competitive grants for multimodal freight and highway projects of national or regional significance to improve the safety, efficiency, and reliability of the movement of freight and people in and across rural and urban areas.
Native Hawaiian Climate Resilience Program
Establishes a program within the U.S. Department of the Interior’s Office of Native Hawaiian Relations to help build capacity within the Native Hawaiian Community to increase resilience in the face of climate change.

Back to Contents

Natural Gas Distribution Infrastructure Safety and Modernization Grant Program
Provides $200 million a year in funding with a total of $1 billion in grant funding over the next five years. The grant funding is to be made available to a municipality or community-owned utility (not including for-profit entities) to repair, rehabilitate, or replace its natural gas distribution pipeline systems or portions thereof or to acquire equipment to reduce incidents and fatalities and to avoid economic losses.

Back to Contents

Next Generation Warning System Grant Program
Supports investments that improve the resilience and security of public broadcasting networks and systems.

The grant will:
- Enable public television broadcasters to upgrade to the Advanced Television Systems Committee broadcast standard (ATSC 3.0).
- Enable public radio stations to upgrade to digital capabilities to enable broadcast of IPAWS alerts.
- Enable the capability to alert, warn and provide equivalent information to individuals with disabilities, individuals with access and functional needs, and individuals with limited-English proficiency.
- Enable alerts and warnings on the basis of geographic location as well as those projects that improve the ability of remote rural areas to receive alerts and warnings.

Back to Contents

Port Infrastructure Development Program
Awards grants that improve the safety, efficiency, or reliability of the movement of goods into, out of, around, or within a port. The grants support efforts by ports and industry stakeholders to improve port and related freight infrastructure to meet the nation’s freight transportation needs and ensure our port infrastructure can meet anticipated growth in freight volumes. The program provides funding to ports in both urban and rural areas for planning and capital projects. It also includes a statutory set-aside for small ports to continue to improve and expand their capacity to move freight reliably and efficiently and support local and regional economies.

Back to Contents
Pre-Commercial Direct Air Capture Prize Competitions Program
Provides funding to advance research, development, demonstration, and commercial application of carbon capture technologies.

Preventing Outages and Enhancing the Resilience of the Electric Grid Grants program
Provides $2.5 billion in matching grants for industry, also known as the Grid Resilience Utility and Industry Grants, and $2.3 billion in formula grants for states and tribes, also known as the Grid Resilience State and Tribal Formula Grant Program.

To qualify, grantees must address at least one of the following:

• Weatherization technologies and equipment
• Fire-resistant technologies and fire prevention systems
• Monitoring and control technologies
• Undergrounding of electrical equipment
• Utility pole management
• Relocation of power lines or the reconductoring of power lines with low sag, advanced conductors
• Vegetation and fuel load management
• Use or construction of distributed energy resources for enhancing system adaptive capacity during disruptive events, including— microgrids and battery storage subcomponents
• Adaptive protection technologies
• Advanced modeling technologies
• Hardening of power lines, facilities, substations, of other systems
• Replacement of old overhead conductors and underground cables

Promoting Resilient Operations for Transformative, Efficient, and Cost-saving Transportation Program (PROTECT) Program
Provides funding to ensure surface transportation resilience to natural hazards including climate change, sea level rise, flooding, extreme weather events, and other natural disasters through support of planning activities, resilience improvements, community resilience and evacuation routes, and at-risk coastal infrastructure.

Pumped Storage Hydropower Wind and Solar Integration and System Reliability Initiative
Provides financial assistance to eligible entities to carry out project design, transmission studies, power market assessments, and permitting for a pumped storage hydropower project to facilitate the long-duration storage of intermittent renewable electricity.
Railroad Crossing Elimination Program
Provides funding for highway-rail or pathway-rail grade crossing improvement projects that focus on improving the safety and mobility of people and goods.

Rebuilding American Infrastructure with Sustainability and Equity Program
Provides funding for the Department of Transportation to invest in road, rail, transit and port projects that promise to achieve national objectives. Previously known as the Better Utilizing Investments to Leverage Development (BUILD) and Transportation Investment Generating Economic Recovery (TIGER) Discretionary Grants, Congress has dedicated nearly $14.3 billion for fifteen rounds of National Infrastructure Investments to fund projects that have a significant local or regional impact.

Reconnecting Communities and Neighborhoods Program
Combines the Reconnecting Communities Pilot and Neighborhood Access and Equity programs, two major discretionary grants into one funding opportunity. The programs will:

- Prioritize disadvantaged communities;
- Improve access to daily needs such as jobs, education, healthcare, food, and recreation;
- Foster equitable development and restoration;
- Reconnect communities by removing, retrofitting, or mitigating highways or other transportation facilities that create barriers to community connectivity, including to mobility, access, or economic development.

Neighborhood Access and Equity (NAE) Grant program
Provides funds for projects that improve walkability, safety, and affordable transportation access through context-sensitive strategies and address existing transportation facilities that create barriers to community connectivity or negative impacts on the human or natural environment, especially in disadvantaged or underserved communities. The program also provides funding for planning and capacity building activities in disadvantaged or underserved communities as well as funding for technical assistance to units of local government to facilitate efficient and effective contracting, design, and project delivery and to build capacity for delivering surface transportation projects.

Reconnecting Communities Pilot (RCP) Program
Provides $1 billion in IRA funding over five years from 2022-2026. The program aims to reconnect communities by removing, retrofitting, or mitigating transportation facilities, like highways or rail lines, that create barriers to community connectivity, mobility, access, or economic development. The program funds planning and capital construction to address infrastructure barriers, reconnect communities, and improve peoples’ lives.
**Reduction of Truck Emissions at Port Facilities Program**
Provides funding to reduce truck idling and emissions at ports, including through the advancement of port electrification. Eligible uses include projects that test, evaluate, and deploy projects that reduce port-related emissions from idling trucks, including through port operations efficiency improvements.

Back to Contents

**Rehabilitation of High Hazard Potential Dams Grant Program**
Provides technical, planning, design and construction assistance in the form of grants for rehabilitation of eligible high hazard potential dams. A state or territory with an enacted dam safety program, the state administrative agency, or an equivalent state agency, is eligible for the grant.

Back to Contents

**Renew America’s Schools**
Provides U.S. Department of Energy with $500 million in IIJA funding to promote the implementation of clean energy improvements at K-12 public schools across the country, aiming to help school communities make energy upgrades that will lower utilities costs, improve indoor air quality, and foster healthier learning environments.

Back to Contents

**Renew America’s Nonprofits Program**
Provides U.S. Department of Energy IIJA funding for energy-efficiency improvements in the nonprofit sector to reduce carbon emissions, improve health and safety, and lower utilities costs at buildings owned and operated by 501(c)(3) nonprofits, allowing critical funds to be redirected to mission-focused work. This program is also referred to the IIJA as the Energy Efficiency Materials Pilot program.

Back to Contents

**Residential Clean Energy Credit**
Equals 30% of the costs of new, qualified clean energy property for a home installed anytime from 2022 through 2033. Individuals may be able to take the credit if they made energy saving improvements to homes located in the United States.

Back to Contents

**Rural and Municipal Utility Advances Cybersecurity Grant and Technical Assistance Program**
Provides grants and technical assistance to, and enter into cooperative agreements with, eligible entities to protect against, detect, respond to, and recover from cybersecurity threats. Funds will be used to deploy advanced cybersecurity technologies for electric utility systems and to increase the participation of eligible entities in cybersecurity threat information sharing programs.
Safe Streets and Roads for All Grant Program
Supports the development of a comprehensive safety action plan (Action Plan) that identifies the most significant roadway safety concerns in a community and the implementation of projects and strategies to address roadway safety issues.

Sanitation Facilities Construction Program
Provides funding to build infrastructure necessary to ensure a safe supply of drinking water, reliable sewage systems, and solid waste disposal facilities. This program is responsible for the delivery of environmental engineering services and sanitation facilities to American Indians and Alaska Natives. It is administered by the Indian Health Service Division of Sanitation Facilities Construction and accomplishes its responsibilities through the allocation of available resources to the twelve Indian Health Service area offices.

Smart Grid Investment Grant Program
Provides funding to accelerate the modernization of the nation’s electric transmission and distribution systems. The program selected projects—electricity providers across the nation with plans to upgrade their systems—through a merit-based, competitive solicitation.

State Digital Equity Planning Program
Provides $60 million to fund states, DC, territories, and tribal entities development of a Digital Equity Plan. The program is part of the larger State Digital Equity Capacity Grant Program, the purpose of which is to promote the achievement of digital equity, support digital inclusion activities, and build capacity for efforts by states, DC, territories, and tribal entities relating to the adoption of broadband by residents of those entities.

State of Good Repair Grants
Provides capital assistance for maintenance, replacement, and rehabilitation projects of high-intensity fixed guideway and motorbus systems to help transit agencies maintain assets in a state of good repair in urbanized areas. Additionally, State of Good Repair formula grants are eligible for developing and implementing Transit Asset Management plans.
**Strengthening Mobility and Revolutionizing Transportation Grants Program**
Provides $100 million annually from 2022 to 2026 to provide grants to eligible public sector agencies to conduct demonstration projects focused on advanced smart community technologies and systems in order to improve transportation efficiency and safety.

**Superfund Hazardous Substance Research and Training Program**
Led by the National Institute of Environmental Health Sciences, supports problem-based, solution-oriented Superfund Research Program (SRP) Centers that consist of multiple, integrated projects representing both the biomedical and environmental science and engineering disciplines; as well as cores tasked with administrative (which includes research translation), data management and analysis, community engagement, research experience and training coordination, and research support functions.

**Transmission Facilitation Program**
Provides $2.5 billion to build out new interregional transmission lines across the country. Administered through the Building a Better Grid Initiative, it is a revolving fund program that will provide federal support to overcome the financial hurdles in the development of large-scale new transmission lines and upgrading existing transmission as well as the connection of microgrids in select states and U.S. territories.

**Tribal Broadband Connectivity Program**
Provides $3 billion to tribal governments to be used for broadband deployment on tribal lands, as well as for telehealth, distance learning, broadband affordability, and digital inclusion.

**Tribal Climate Resilience**
Supports climate preparedness and resilience for all federally recognized Tribal Nations and Alaska Native villages through technical and financial assistance, access to scientific resources and educational opportunities. Tribal Climate Resilience partners with Tribal Nations and Bureau of Indian Affairs (BIA) agencies to incorporate climate considerations into their programs and policies by providing funding, training, technical assistance and organizational support.

**Tribal Climate Resilience Annual Awards Program**
Provides financial support for federally recognized Tribal Nations and authorized Tribal organizations through a competitive funding opportunity to build Tribal resilience capacity. The Tribal Climate Resilience Annual Awards Program supports both planning and implementation projects, including for climate adaptation planning, community-led relocation, managed retreat (i.e., partial relocation),
protect-in-place efforts, ocean and coastal management, as well as for habitat restoration and adaptation.

Back to Contents

**Tribal Electrification Program**
Provides $145.5 million in financial and technical assistance to Tribes to increase the number of Tribal homes with zero-emission electricity. Eligible uses include the provision of electricity to unelectrified Tribal homes through zero-emissions energy systems; transitioning electrified Tribal homes to zero-emissions energy systems; and associated home repairs and retrofitting necessary to install the zero-emissions energy systems.

Back to Contents

**Tribal Energy Financing Program**
Supports tribal investment in energy-related projects by providing direct loans or partial loan guarantees to federally recognized tribes, including Alaska Native village or regional or village corporations; or a Tribal Energy Development Organization that is wholly or substantially owned by a federally recognized Indian tribe or Alaska Native Corporation.

Back to Contents

**Underground Injection Control Grants**
Provides funding for grants aimed at developing and implementing training programs that protect drinking water sources. The U.S. EPA’s Office of Water is inviting states, tribes and territories to submit letters of intent to indicate their interest in the new grant program.

Back to Contents

**University Transportation Centers Program**
Awards and administers grants to a consortium of colleges and universities across the United States. The program advances the state-of-the-art in transportation research and technology and develops the next generation of transportation professionals.

Back to Contents

**Watershed and Flood Prevention Operations Program**
Provides technical and financial assistance to states, local governments and Tribal organizations to help plan and implement authorized watershed projects for the purpose of:

- Flood Prevention
- Watershed Protection
- Public Recreation
- Public Fish and Wildlife
- Agricultural Water Management
- Municipal and Industrial Water Supply
Water Quality Management

Watershed Rehabilitation Program
Helps project sponsors rehabilitate aging dams that are reaching the end of their design life and/or no longer meet federal or state safety criteria or performance standards.

WaterSMART Water and Energy Efficiency Grants
Provides 50/50 cost share funding to irrigation and water districts, tribes, states and other entities with water or power delivery authority. Projects conserve and use water more efficiently; increase the production of hydropower; mitigate conflict risk in areas at a high risk of future water conflict; and accomplish other benefits that contribute to water supply reliability in the western United States. Projects are selected through a competitive process and the focus is on projects that can be completed within two or three years.

Baseline Vulnerability – Environment
Air Pollution Monitoring
Provides $117.5 million that can be used to deploy, integrate, support, and maintain fence-line air monitoring, screening air monitoring, national air toxics trend stations, and other air toxics and community monitoring.

Battery and Critical Mineral Recycling
Awards grants for research, development, and demonstration projects to create innovative and practical approaches to increase the reuse and recycling of batteries.

Battery Manufacturing and Recycling Grants
Provides grants to ensure that the United States has a viable domestic manufacturing and recycling capability to support a North American battery supply chain.
**Brownfield Grant Funding**
Provides direct funding for brownfields assessment, cleanup, revolving loans, environmental job training, technical assistance, training, and research.

Back to Contents

**Brownfield Job Training Grants**
Recruits, trains, and places local, unemployed and under-employed residents with the skills needed to secure full-time employment in the environmental sector, including nonprofit organizations.

Back to Contents

**Clean Heavy-Duty Vehicle Program**
Provides $1 billion to replace dirty heavy-duty vehicles with clean, zero-emission vehicles, support zero-emission vehicle infrastructure, and to train and develop workers. EPA will be distributing this $1 billion in funding for clean heavy-duty vehicles between now and 2031 and $400 million will be going to communities in nonattainment areas. EPA anticipates this new funding opportunity may begin later in 2023.

Back to Contents

**Clean Ports Program**
Provides $3 billion to reduce air pollutants at U.S. ports by funding zero-emission port equipment and technology and helping ports develop climate action plans.

Back to Contents

**Clean School Bus Program**
Provides $5 billion over the next five years (2022-2026) to replace existing school buses with zero-emission and low-emission models.

Back to Contents

**Clean Vehicle Credit**
The U.S. Internal Revenue Service (IRS) provides resources on how to determine eligibility for clean vehicle credits and how to claim them:

- [Credits for New Electric Vehicles Purchased in 2023 or After](#)
- [Credits for New Electric Vehicles Purchased in 2022 or Before](#)
- [Used Electric Vehicle Credit](#)
- [Commercial Clean Vehicle Credit](#)
- [Clean Vehicle Credit Qualified Manufacturer Requirements](#)
- [Clean Vehicle Credit Dealer Requirements](#)
- [Excise Tax Credits for Alternative Fuels, Biodiesel, and Renewable Diesel](#)
Clean Water State Revolving Fund
Provides low-cost financing to communities for a wide range of water quality infrastructure projects, including municipal wastewater facilities, nonpoint source pollution control, decentralized wastewater treatment systems, stormwater runoff mitigation, green infrastructure, estuary protection, and water reuse.

Climate Pollution Reduction Grants
Provides $5 billion to support efforts by states, municipalities, air pollution control agencies, tribes, and groups thereof to develop and implement strong, local greenhouse gas reduction strategies. This two-phase grant program provides funding of $250 million for noncompetitive planning grants, and $4.6 billion for competitive implementation grants.

Competitive grants for non-federal forest landowners
Provides $550 million for competitive grants to non-Federal forest landowners to help sustain healthy and resilient working forests. The funding prioritizes underserved and small forest landowners in carrying out climate mitigation and forest resilience efforts.

Consumer Electronics Battery Recycling, Reprocessing, and Battery Collection
Provides funding to support the recycling of consumer electronics batteries and battery-containing devices to help build a robust domestic critical material supply chain for EV batteries in the United States. The funding will accomplish this by: 1) increasing the participation by consumers in recycling programs; 2) improving the economics of consumer battery recycling to create a market for recycling, including battery recycling research, development, and demonstration activities to create innovative and practical approaches to increase the reuse and recycling of batteries; and 3) increasing the number of these programs, including state and local programs to assist in the establishment or enhancement of state consumer electronics battery collection, recycling, and reprocessing programs and to establish collection points at retailers.

Diesel Emissions Reduction Act Program
Funds grants and rebates that protect human health and improve air quality by reducing harmful emissions from diesel engines.
**Electric Drive Vehicle Battery Recycling and Second-Life Applications Program**
Expands an existing program at Department of Energy for research, development, and demonstration of electric vehicle battery recycling and second-life applications for vehicle batteries.

**Environmental and Climate Justice Grants**

*Environmental and Climate Justice (ECJ) Grant Program*
Provides $2.8 billion for financial assistance and $200 million for technical assistance to carry out environmental and climate justice activities to benefit underserved and overburdened communities. EPA must award grants and technical assistance under the ECJ Program by September 30, 2026.

*Environmental Justice Thriving Communities Grantmaking (EJ TCGM) Program*
Selects multiple grantmakers around the nation to reduce barriers to the federal grants application process communities face and increase the efficiency of the awards process for environmental justice grants. Grantmakers will design competitive application and submission processes, award environmental justice subgrants, implement a tracking and reporting system, provide resources and support to communities, all in collaboration with EPA’s Office of Environmental Justice and External Civil Rights.

*Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program*
Provides financial assistance to eligible organizations working to address local environmental or public health issues in their communities. The program assists recipients in building collaborative partnerships with other stakeholders (e.g., local businesses and industry, local government, medical service providers, academia, etc.) to develop solutions to environmental or public health issue(s) at the community level.

*Environmental Justice Government-to-Government (EJG2G) Program*
Provides funding at the state, local, territorial, and tribal level to support government activities that lead to measurable environmental or public health impacts in communities disproportionately burdened by environmental harms.

Model EJG2G programs should leverage existing resources to develop processes or tools that integrate environmental justice considerations into governmental decision-making at all levels. Formerly known as EPA’s State Environmental Justice Cooperative Agreement Program, this program has been renamed to better reflect the spectrum of entities eligible for this funding.

**Funding to Address Air Pollution at Schools**
Provides $37.5 million for grants and other activities to monitor and reduce air pollution and greenhouse gas emissions at schools in low-income and disadvantaged communities, and $12.5 million for technical assistance to address environmental issues, develop school environmental quality plans, identify, and mitigate ongoing air pollution hazards.
Greenhouse Gas Reduction Fund
Provides $27 billion to mobilize financing and private capital to address the climate crisis, ensure the country’s economic competitiveness, and promote energy independence while delivering lower energy costs and economic revitalization to communities that have historically been left behind.

National Clean Investment Fund
Provides $14 billion in grants to 2 to 3 national nonprofit clean financing institutions capable of partnering with the private sector to provide accessible, affordable financing for tens of thousands of clean technology projects across the country.

Clean Communities Investment Accelerator
Provides $6 billion in grants to 2 to 7 hub nonprofits that will, in turn, deliver funding and technical assistance to build the clean financing capacity of local community lenders working in low-income and disadvantaged communities—so that underinvested communities have the capital they need to deploy clean technology projects.

Solar for All
Awards up to 60 grants to states, territories, Tribal governments, municipalities, and eligible nonprofit recipients to expand the number of low-income and disadvantaged communities primed for distributed solar investment—enabling millions of low-income households to access affordable, resilient, and clean solar energy. Grantees will use funds to expand existing low-income solar programs or design and deploy new Solar for All programs nationwide.

Joint Chiefs’ Landscape Restoration Partnership Program
Enables Natural Resources Conservation Service and the U.S. Forest Service to collaborate with agricultural producers, forest landowners, tribes and public land managers to invest in conservation and restoration at a big enough scale to make a positive difference. Working in partnership, and at this scale, helps reduce wildfire threats to communities, protect water quality and supply, and improve wildlife habitat for at-risk species.

Joint Fire Science Program
Provides funding for scientific studies associated with wildland fire, fuels, and fire-impacted ecosystems that respond to the emerging needs of land managers, practitioners, and policymakers.

Lithium-Ion Battery Recycling Prize Competition
Provides a prize for recycling of lithium-ion batteries and convene a task force on battery producer requirements.
Methane Emissions Reduction Program
Provides funding and new authorities to reduce methane emissions from the petroleum and natural gas sector. The program also provides financial and technical assistance and establishes a waste emissions charge for methane from applicable facilities.

Natural Gas Distribution Infrastructure Safety and Modernization Grant Program
Provides $200 million a year in funding with a total of $1 billion in grant funding over the next five years. The grant funding is to be made available to a municipality or community-owned utility (not including for-profit entities) to repair, rehabilitate, or replace its natural gas distribution pipeline systems or portions thereof or to acquire equipment to reduce incidents and fatalities and to avoid economic losses.

Orphan Well Site Plugging, Remediation, and Restoration Programs
Orphaned Well Site Plugging, Remediation, And Restoration Program
Provides funding from the U.S. Department of Energy’s Office of Fossil Energy and Carbon Management to plug wells on federal land and issue grants to states and tribes on state, private, and tribal land.

Federal Orphaned Well Program
Led by the U.S. Department of the Interior (DOI)’s Bureau of Land Management, provides IIJA historic investments to help revitalize local economies and support jobs, while addressing environmental impacts from legacy developments. This multi-agency effort to remediate orphaned wells on federal lands includes DOI Land Management Agencies, the U.S. Forest Service, Department of Energy, Environmental Protection Agency, and the Interstate Oil & Gas Commission Compact.

Orphaned Wells on Tribal Lands
Provides up to $150 million in federal IIJA funding for the purpose of plugging orphaned wells and remediating and reclaiming orphaned well sites on tribal lands. Tribes may seek funding to undertake the well plugging or may request that the Secretary administer the well plugging on behalf of the tribe.

Reduction of Truck Emissions at Port Facilities Program
Provides funding to reduce truck idling and emissions at ports, including through the advancement of port electrification. Eligible uses include projects that test, evaluate, and deploy projects that reduce port-related emissions from idling trucks, including through port operations efficiency improvements.
Superfund Hazardous Substance Research and Training Program
Led by the National Institute of Environmental Health Sciences, supports problem-based, solution-oriented Superfund Research Program (SRP) Centers that consist of multiple, integrated projects representing both the biomedical and environmental science and engineering disciplines; as well as cores tasked with administrative (which includes research translation), data management and analysis, community engagement, research experience and training coordination, and research support functions.

Underground Injection Control Grants
Provides funding for grants aimed at developing and implementing training programs that protect drinking water sources. The U.S. EPA’s Office of Water is inviting states, tribes and territories to submit letters of intent to indicate their interest in the new grant program.

Climate Change Impacts
Building Resilient Infrastructure and Communities
Supports states, local communities, tribes and territories as they undertake hazard mitigation projects, reducing the risks they face from disasters and natural hazards.

The IIJA provides $1 billion over five years, which is in addition to the funding the Federal Emergency Management Agency provides through setting aside up to 6% of the assistance the agency provides following major disaster declarations through the Public Assistance and Individuals and Households Program.

Carbon Capture Demonstration Program
Provides $2.5 billion to develop six carbon capture facilities to significantly improve the efficiency, effectiveness, costs, emissions reductions, and environmental performance of coal and natural gas use. This program will focus on integrated carbon capture, transport, and storage technologies and infrastructure that can be readily replicated and deployed at fossil energy power plants and major industrial sources of CO2, such as cement, pulp and paper, iron and steel, and certain types of chemical production facilities.

Carbon Dioxide Transportation Infrastructure Finance and Innovation Program
Finances projects that build shared (i.e., common carrier) transport infrastructure to move CO2 from points of capture to conversion facilities and/or storage wells. This CO2 transport infrastructure will
provide economies of scale and help form an interconnected carbon management ecosystem in the United States.

**Carbon Storage Validation and Testing Program**
Establishes a program of research, development, and demonstration for carbon storage. Funds will be aimed at the development of new or expanded commercial large-scale carbon sequestration projects and associated carbon dioxide transport infrastructure, including funding for the feasibility, site characterization, permitting, and construction stages of project development.

**Carbon Utilization Program**
Establishes a grant program for state and local governments to procure and use products derived from captured carbon oxides. An eligible entity shall use a grant to procure and use commercial or industrial products that use or are derived from anthropogenic carbon oxides and demonstrate significant net reductions in lifecycle greenhouse gas emissions compared to incumbent technologies, processes, and products.

**Climate Change Technical Assistance Program**
Provides $15 million for the Office of Insular Affairs to provide technical assistance for climate change planning, mitigation, adaptation, and resilience to United States Insular Areas Governments. The Insular Areas include American Samoa, the Commonwealth of the Northern Mariana Islands, Guam, Puerto Rico, and the U.S. Virgin Island. Use CFDA# 15.875

**Climate Pollution Reduction Grants**
Provides $5 billion to support efforts by states, municipalities, air pollution control agencies, tribes, and groups thereof to develop and implement strong, local greenhouse gas reduction strategies. This two-phase grant program provides funding of $250 million for noncompetitive planning grants, and $4.6 billion for competitive implementation grants.

**Competitive Grants for Non-Federal Forest Landowners**
Provides $550 million for competitive grants to non-federal forest landowners to help sustain healthy and resilient working forests. The funding prioritizes underserved and small forest landowners in carrying out climate mitigation and forest resilience efforts.
**Community Wildfire Defense Grants**
Provides $1 billion to a five-year, competitive program designed to assist at-risk communities, including Tribal communities, non-profit organizations, state forestry agencies and Alaska Native corporations with planning for and mitigating wildfire risks.

Back to Contents

**Drinking Water System Infrastructure Resilience and Sustainability Program**
Awards grants to assist underserved, small, and disadvantaged communities for the purpose of increasing drinking water facility resilience to natural hazards.

Back to Contents

**Emergency Drought Relief for Tribes**
Funds near-term drought relief actions to mitigate drought impacts for Indian Tribes affected by the operation of a Bureau of Reclamation water project, including water shortages, and to mitigate the loss of Tribal trust resources.

Back to Contents

**Emergency Watershed Protection Program**
Offers technical and financial assistance to help local communities relieve imminent threats to life and property caused by floods, fires, windstorms and other natural disasters that impair a watershed. The program does not require a disaster declaration by federal or state government officials for program assistance to begin.

Back to Contents

**Energy Infrastructure Reinvestment Program**
Guarantees loans to projects that retool, repower, repurpose, or replace energy infrastructure that has ceased operations, or enable operating energy infrastructure to avoid, reduce, utilize, or sequester air pollutants or anthropogenic emissions of greenhouse gases.

Back to Contents

**Environmental and Climate Justice Grants**

- **Environmental and Climate Justice (ECJ) Grant Program**
  Provides $2.8 billion for financial assistance and $200 million for technical assistance to carry out environmental and climate justice activities to benefit underserved and overburdened communities. EPA must award grants and technical assistance under the ECJ Program by September 30, 2026.

- **Environmental Justice Thriving Communities Grantmaking (EJ TCGM) Program**
  Selects multiple grantmakers around the nation to reduce barriers to the federal grants application process communities face and increase the efficiency of the awards process for environmental justice grants. Grantmakers will design competitive application and submission processes, award
environmental justice subgrants, implement a tracking and reporting system, provide resources and support to communities, all in collaboration with EPA’s Office of Environmental Justice and External Civil Rights.

**Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program**
Provides financial assistance to eligible organizations working to address local environmental or public health issues in their communities. The program assists recipients in building collaborative partnerships with other stakeholders (e.g., local businesses and industry, local government, medical service providers, academia, etc.) to develop solutions to environmental or public health issue(s) at the community level.

**Environmental Justice Government-to-Government (EJG2G) Program**
Provides funding at the state, local, territorial, and tribal level to support government activities that lead to measurable environmental or public health impacts in communities disproportionately burdened by environmental harms.

Model EJG2G programs should leverage existing resources to develop processes or tools that integrate environmental justice considerations into governmental decision-making at all levels. Formerly known as EPA’s State Environmental Justice Cooperative Agreement Program, this program has been renamed to better reflect the spectrum of entities eligible for this funding.

Back to Contents

**Federal Emergency Management Agency Preparedness Grants**
Supports citizens and first responders to build, sustain and improve the nation’s capability to prepare for, protect against, respond to, recover from and mitigate terrorism and other high-consequence disasters and emergencies.

Back to Contents

**Federal Emergency Management Agency (FEMA) Public Assistance Program**
Provides supplemental grants to state, tribal, territorial, and local governments, and certain types of private non-profits so communities can quickly respond to and recover from major disasters or emergencies. After an event like a hurricane, tornado, earthquake or wildfire, communities need help to cover their costs for debris removal, life-saving emergency protective measures, and restoring public infrastructure. FEMA also encourages protecting these damaged facilities from future events by providing assistance for hazard mitigation measures during the recovery process.

Back to Contents

**Flood Mitigation Assistance (FMA) Grant Program**
Provides $3.5 billion in Flood Mitigation Assistance grants to states, local communities, tribes, and territories over five years – $700 million per year from 2022 to 2026. Reduces or eliminates the risk of repetitive flood damage to buildings insured under the National Flood Insurance Program.

Back to Contents
Green and Resilient Retrofit Program
Provides funding for direct loans and grants to fund projects that improve energy or water efficiency, enhance indoor air quality or sustainability, implement the use of zero-emission electricity generation, low-emission building materials or processes, energy storage, or building electrification strategies, or address climate resilience, of eligible Department of Housing and Urban Development (HUD)-assisted multifamily properties. There is also funding available under this provision for HUD’s benchmarking initiative that will finance Energy and Water benchmarking of HUD-assisted properties to measure usage and efficiency of those properties.

Greenhouse Gas Reduction Fund
Provides $27 billion to mobilize financing and private capital to address the climate crisis, ensure the country’s economic competitiveness, and promote energy independence while delivering lower energy costs and economic revitalization to communities that have historically been left behind.

National Clean Investment Fund
Provides $14 billion in grants to 2 to 3 national nonprofit clean financing institutions capable of partnering with the private sector to provide accessible, affordable financing for tens of thousands of clean technology projects across the country.

Clean Communities Investment Accelerator
Provides $6 billion in grants to 2 to 7 hub nonprofits that will, in turn, deliver funding and technical assistance to build the clean financing capacity of local community lenders working in low-income and disadvantaged communities—so that underinvested communities have the capital they need to deploy clean technology projects.

Solar for All
Awards up to 60 grants to states, territories, Tribal governments, municipalities, and eligible nonprofit recipients to expand the number of low-income and disadvantaged communities primed for distributed solar investment—enabling millions of low-income households to access affordable, resilient, and clean solar energy. Grantees will use funds to expand existing low-income solar programs or design and deploy new Solar for All programs nationwide.

Hazard Mitigation Assistance Grants
Provides funding for eligible mitigation measures that reduce disaster losses. "Hazard mitigation" is any sustainable action that reduces or eliminates long-term risk to people and property from future disasters. Mitigation planning breaks the cycle of disaster damage, reconstruction and repeated damage. Hazard mitigation includes long-term solutions that reduce the impact of disasters in the future.
**Methane Emissions Reduction Program**
Provides funding and new authorities to reduce methane emissions from the petroleum and natural gas sector. The program also provides financial and technical assistance and establishes a waste emissions charge for methane from applicable facilities.

**National Dam Safety Program (NDSP) State Assistance Grant Program**
Provides financial assistance to states for strengthening their dam safety programs. The states use NDSP funds for the following types of activities:
- Dam safety training for state personnel
- Increase in the number of dam inspections
- Increase in the submittal and testing of Emergency Action Plans
- More timely review and issuance of permits
- Improved coordination with state emergency preparedness officials
- Identification of dams to be repaired or removed
- Conduct dam safety awareness workshops and creation of dam safety videos and other outreach materials

**National Earthquake Hazards Reduction Program’s State Assistance Program**
Provides funds to increased and enhance the effective implementation of earthquake risk reduction at the local level, reducing the risks to people and property posed by natural hazards.

**National Flood Insurance Program**
Provides flood insurance to property owners, renters and businesses, and works with communities required to adopt and enforce floodplain management regulations that help mitigate flooding effects. Flood insurance is available to anyone living in one of the almost 23,000 participating National Flood Insurance Program communities, helping them recover faster when floodwaters recede. Homes and businesses in high-risk flood areas with mortgages from government backed lenders are required to have flood insurance.

**Native Hawaiian Climate Resilience Program**
Establishes a program within the U.S. Department of the Interior’s Office of Native Hawaiian Relations to help build capacity within the Native Hawaiian Community to increase resilience in the face of climate change.
Preventing Outages and Enhancing the Resilience of the Electric Grid Grants program
Provides $2.5 billion in matching grants for industry, also known as the Grid Resilience Utility and Industry Grants, and $2.3 billion in formula grants for states and tribes, also known as the Grid Resilience State and Tribal Formula Grant Program.

Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation Program
Provides funding to ensure surface transportation resilience to natural hazards including climate change, sea level rise, flooding, extreme weather events, and other natural disasters through support of planning activities, resilience improvements, community resilience and evacuation routes, and at-risk coastal infrastructure.

Safeguarding Tomorrow Revolving Loan Fund Program
Provides capitalization grants to states, eligible federally recognized tribes, territories and the District of Columbia to establish revolving loan funds that provide hazard mitigation assistance for local governments to reduce risks from natural hazards and disasters.

Tribal Climate Resilience
Supports climate preparedness and resilience for all federally recognized Tribal Nations and Alaska Native villages through technical and financial assistance, access to scientific resources and educational opportunities. Tribal Climate Resilience partners with Tribal Nations and Bureau of Indian Affairs agencies to incorporate climate considerations into their programs and policies by providing funding, training, technical assistance and organizational support.

Tribal Climate Resilience Annual Awards Program
Provides financial support for federally recognized Tribal Nations and authorized Tribal organizations through a competitive funding opportunity to build Tribal resilience capacity. The Tribal Climate Resilience Annual Awards Program supports both planning and implementation projects, including for climate adaptation planning, community-led relocation, managed retreat (i.e., partial relocation), protect-in-place efforts, ocean and coastal management, as well as for habitat restoration and adaptation.
Underground Injection Control Grants
Provides funding for grants aimed at developing and implementing training programs that protect drinking water sources. The U.S. Environmental Protection Agency’s Office of Water is inviting states, tribes, and territories to submit letters of intent to indicate their interest in the new grant program.

Back to Contents

Watershed and Flood Prevention Operations Program
Provides technical and financial assistance to states, local governments, and tribal organizations to help plan and implement authorized watershed projects for the purpose of:

- Flood Prevention
- Watershed Protection
- Public Recreation
- Public Fish and Wildlife
- Agricultural Water Management
- Municipal and Industrial Water Supply
- Water Quality Management

Back to Contents

Additional Region-Specific Funding
Recent legislation also provided funds to the eight federal regional commissions and authorities through which more grants and opportunities may be available:

Appalachian Regional Commission
Delta Regional Authority
Denali Commission
Great Lakes Authority
Northern Border Regional Commission
Northeastern Great Plains Regional Authority
Southeast Crescent Regional Commission
Southwest Border Regional Commission

In addition, the U.S. Environmental Protection Agency will be making significant investments in health, equity, and resilience of American communities; the IIJA sets aside almost $2 billion for the following geographic programs and more, where funding will be made available:
Great Lakes Restoration
Chesapeake Bay
San Francisco Bay
Puget Sound
Long Island Sound
Gulf of Mexico
South Florida
Lake Champlain
Lake Pontchartrain
Southern New England Estuaries
Columbia River Basin
Pacific Northwest
National Estuary Program
Gulf Hypoxia Program

Back to Contents

**Funding Trackers and Guides**

**Grants.gov**
In order to apply for any federal grant, applicants will need to register on Grants.gov. [Here](#) is more information on how to search for federal funding, determine your eligibility, and complete an application.

**USASpending**
USASpending is the official open data source of federal spending information, including information about federal awards such as contracts, grants, and loans.

**Inflation Reduction Act Tracker**
IRATracker.org is a joint project of Columbia Law School’s Sabin Center for Climate Change Law and Environmental Defense Fund. The IRA Database compiles information about the climate change-related provisions of the 2022 Inflation Reduction Act. Actions taken by federal agencies to implement those provisions are recorded in the IRA Tracker.

**Inflation Reduction Act Guidebook**
This guidebook provides an overview of the clean energy, climate mitigation and resilience, agriculture, and conservation-related investment programs in President Biden’s Inflation Reduction Act, including who is eligible to apply for funding and for what activities.
**Bipartisan Infrastructure Law Launchpad**
The Bipartisan Infrastructure Law (BIL) offers unprecedented opportunities for local governments and communities to secure competitive federal grants and modernize America's infrastructure. To help navigate transportation grant programs and expedite applications, the BIL Launchpad provides customized information on available funding, interactive technical support, data on successful awards, and essential resources. With this platform, localities can accelerate their grant application process and access the necessary tools to enhance their transportation infrastructure.

**Bipartisan Infrastructure Law Maps Dashboard**
These maps show how much funding has been announced for work within states, including a breakdown by category of funding. This total includes “formula” funds allocated directly to states for roads and bridges or water systems, for example, as well as funding for airports, ports and superfund site cleanup. A separate tab showcases specific announced and select awarded funding locations and projects. Hover over the dot to see details. These maps are intended to be illustrative of the scope of the IIJA and the impact it has in all American communities.

**Bipartisan Infrastructure Law Tribal Playbook**
This playbook has two specific goals and is organized in two parts. First, it serves to identify programs and sources of funds specifically set aside for Tribal communities under the IIJA. There are over $13 billion dollars in tribal-specific programs or set-asides for tribes within existing programs under the law. The first half of this document provides an outline of these funds and guidance on where to seek technical assistance and further information. Secondly, it provides a guide to tribal eligibility for other programs under the law and identify specific benefits or flexibilities for tribes and tribal communities – like waivers for federal matching requirements for Tribal Nations that apply for competitive funds or enhanced benefits under existing programs for members of Tribal Nations. In partnership with the Bureau of Indian Affairs, the White House also has identified more than 150 programs under the law where tribes or tribal entities are eligible to apply for funding.

**Environmental Justice Scorecard**
This first version of the Environmental Justice Scorecard, or the Phase One Scorecard, presents a baseline assessment of actions taken by federal agencies in 2021 and 2022 to help achieve the Biden-Harris Administration's environmental justice goals. The Phase One Scorecard reports on the progress of 24 federal agencies in the following areas:
- Advancing the President's Justice40 Initiative
- Implementing and enforcing environmental and civil rights laws
- Embedding environmental justice throughout the federal government

**EPA EJ Screen**
EJScreen is the U.S. Environmental Protection Agency's environmental justice mapping and screening tool that provides EPA with a nationally consistent dataset and approach for combining environmental and demographic socioeconomic indicators.
